Anticorps Polyclonal de lapin anti-LC3B-Specific

Numéro de catalogue: 18725-1-AP 250 Publications

Informations de base

Numéro de catalogue:	Numéro d'acquisition GenBank:	Méthode de purification:
18725-1-AP	NM_022818	Purification par affinité contre l'antigène
Taille:	Identification du gène (NCBI):	Dilutions recommandées:
150ul , Concentration: 500 µg/ml by Nanodrop;	81631	WB 1:300-1:1000 IHC 1:50-1:500 IF 1:50-1:500
Hôte:	Nom complet:	
Lapin	microtubule-associated protein 1 light chain 3 beta	
Isotype:	MW calculé	
IgG	15 kDa	
	MW observés:	
	15 kDa, 18 kDa	

Applications

Applications testées:	Contrôles positifs:
FC, IF, IHC, WB, ELISA	WB : tissu cérébral humain, cellules A549, cellules HepG2, cellules MCF-7, HEK-293 traitées aux UV, Hela traitées au TN, tissu cérébral de souris
Demandes citées:	IHC : tissu cérébral de souris, tissu cérébral de rat
IF, IHC, IP, WB	IF : cellules HepG2 traitées à la chloroquine, cellules HeLa traitées à la chloroquine, cellules HepG2 traitées par déprivation
Spécificité de l'espèce:	
Humain, rat, souris	
Espèces citées:	
bovin, Humain, porc, rat, souris	
Remarque-IHC: il est suggéré de démasquer l'antigène avec un tampon de TE buffer pH 9,0; (*) À défaut, le démasquage de l'antigène peut être effectué avec un tampon citrate pH 6,0.	

Informations générales

LC3B, also named as MAP1LC3B, MAP1A/1BLC3, belongs to the MAP1 LC3 family. It is a subunit of neuronal microtubule-associated MAP1A and MAP1B proteins, which are involved in microtubule assembly and important for neurogenesis. In cell biology, autophagy, or autopagocytosis, is a catabolic process involving the degradation of a cell's own components through the lysosomal machinery. It is a major mechanism by which a starving cell reallocates nutrients from unnecessary processes to more-essential processes. Two forms of LC3, called LC3-I (17-19kD) and -II(14-16kD), were produced post-translationally in various cells. LC3-I is cytosolic, whereas LC3-II is membrane bound. The precursor molecule is cleaved by APG4B/ATG4B to form the cytosolic form, LC3-I. This is activated by APG7L/ATG7, transferred to ATG3 and conjugated to phospholipid to form the membrane-bound form, LC3-II. The amount of LC3-II is correlated with the extent of autophagosome formation. LC3-II is the first mammalian protein identified that specifically associates with autophagosome membranes. MAP1LC3 has 3 isoforms MAP1LC3A, MAP1LC3B and MAP1LC3C. MAP1LC3A and MAP1LC3C are produced by the proteolytic cleavage after the conserved C-terminal Gly residue, like their rat counterpart, MAP1LC3B does not undergo C-terminal cleavage and exists in a single modified form. This antibody is specific to LC3B.

Stockage

Stockage:

Stocker à -20°C. Stable pendant un an après l'expédition.

Tampon de stockage:

PBS avec azoture de sodium à 0,02 % et glycérol à 50 % pH 7,3

L'aliquotage n'est pas nécessaire pour le stockage à -20C

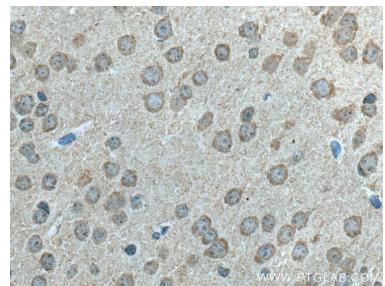

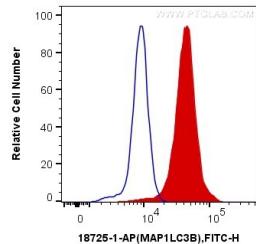

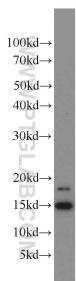

*** Les 20ul contiennent 0,1% de BSA.

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

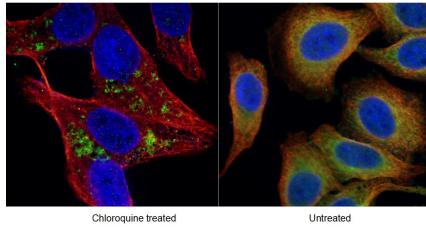

Données de validation sélectionnées

human brain tissue were subjected to SDS PAGE followed by western blot with 18725-1-AP (LC3B-Specific antibody) at dilution of 1:1000 incubated at room temperature for 1.5 hours.

1X10⁶ HeLa cells were intracellularly stained with 0.4 ug Anti-Human LC3B-Specific (18725-1-AP) and CoraLite®488-Conjugated AffiniPure Goat Anti-Rabbit IgG(H+L) at dilution 1:1000 (red), or 0.4 ug Control Antibody. Cells were fixed with 4% PFA and permeabilized with Flow Cytometry Perm Buffer (PF00011-C).

Immunohistochemical analysis of paraffin-embedded mouse brain tissue slide using 18725-1-AP (LC3B-Specific antibody) at dilution of 1:200 (under 40x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).

Immunofluorescent analysis of -20°C Ethanol fixed CQ treated HepG2 cells (left) and untreated HepG2 cells (right) using 18725-1-AP (LC3B-Specific antibody) at dilution of 1:50 and Alexa Fluor 488-conjugated AffiniPure Goat Anti-Rabbit IgG(H+L). The cytoskeleton was labelled in red with 66031-1 Ig (alpha tubulin).
