## Informations générales

THAP2, also named as THAP domain-containing protein 2, is a 228 amino acid protein, which contains one THAP-type zinc finger. Members of the THAP (thanatos-associated protein) family of proteins contain a well conserved DNA-binding domain known as the THAP-type zinc finger motif. Proteins containing the THAP-type zinc finger motif are commonly involved in transcriptional regulation, cell-cycle control, apoptosis and chromatin modification

## Données de validation sélectionnées

HEK-293 cells were subjected to SDS PAGE followed by western blot with 20853-1-AP (THAP2 antibody) at dilution of 1:600 incubated at room temperature for 1.5 hours.

Immunofluorescent analysis of HeLa cells, using THAP2 antibody 20853-1-AP at 1:25 dilution and Rhodamine-labeled goat anti-rabbit IgG (red).
