Informations de base

Numéro de catalogue:	BC026327	Méthode de purification:
21875-1-AP	Identification du gène (NCBI):	Purification par affinité contre l'antigène
Taille:	2043	Dilutions recommandées:
150µl, Concentration: 500 µg/ml by Nanodrop;	Nom complet:	WB 1:500-1:2000
Hôte:	EPH receptor A4	IP 0.5-4.0 ug for IP and 1:500-1:2000 for WB
Lapin	MW calculé	IHC 1:1000-1:4000
Isotype:	986 aa, 110 kDa	IF 1:50-1:500
IgG	MW observés:	
Immunogen Catalog Number:	120 kDa	
AG16233		

Applications

Applications testées:	Contrôles positifs:
FC, IF, IHC, IP, WB, ELISA	WB : tissu cérébral de souris, tissu cérébral de rat
Demandes citées:	IP : tissu cérébral de souris,
Cell treatment, FC, IF, WB	IHC : tissu cérébral de souris,
Spécificité de l'espèce:	IF : Cellules neuronales,
Humain, rat, souris	
Espèces citées:	
Humain, souris	
<i>Remarque-IHC: il est suggéré de démasquer l'antigène avec un tampon de TE buffer pH 9,0; (*) À défaut, le démasquage de l'antigène peut être effectué avec un tampon citrate pH 6,0.</i>	

Informations générales

EphA4 is a member of the Eph receptor tyrosine kinase family and has important functions in the developing and adult nervous system (PMID: 14697664). The Eph receptors comprise a large family of closely related transmembrane tyrosine kinases that actively signal when bound to their ephrin ligands. The Eph receptors are characterized by an extracellular region with a unique cysteine-rich motif extending over its amino-terminal half, followed by two fibronectin type III motifs (PMID: 9530499). They are divided into two sub-groups (EphA and EphB) based on the similarity of their extracellular domain sequences and their affinities for binding ephrin-A and ephrin-B ligands (PMID: 11114742). EphA4 is involved in commissure formation within the forebrain, axonal guidance in the corticospinal tract, regulation of the central pattern generator that provides normal locomotor function and axonal regeneration following spinal cord injury (PMID: 30061574). EphA4 has been implicated as a disease modifier of amyotrophic lateral sclerosis (ALS) (PMID: 22922411).

Stockage

Stockage:

Stocker à -20°C. Stable pendant un an après l'expédition.

Tampon de stockage:

PBS avec azoture de sodium à 0,02 % et glycérol à 50 % pH 7,3

L'aliquotage n'est pas nécessaire pour le stockage à -20°C

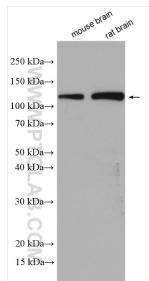

*** Les 20ul contiennent 0,1% de BSA.

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

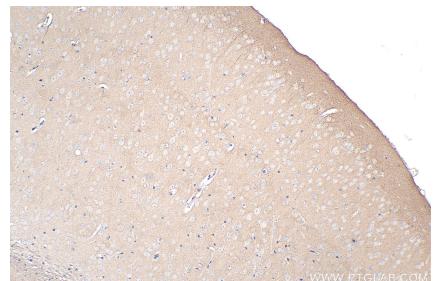

Données de validation sélectionnées

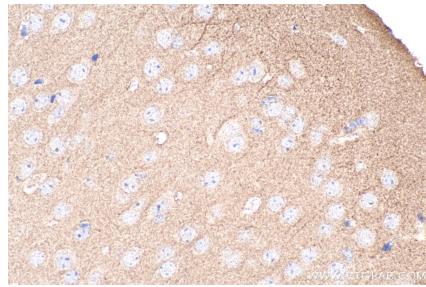

Various lysates were subjected to SDS PAGE followed by western blot with 21875-1-AP (EphA4 antibody) at dilution of 1:1000 incubated at room temperature for 1.5 hours.

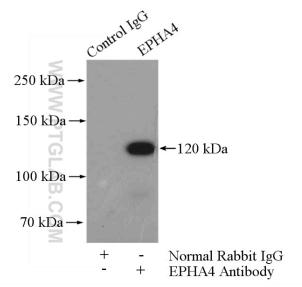

IF result of EphA4 antibody (21875-1-AP, 1:50) with culture neuron cells by Wilson Pak Kin Lou.

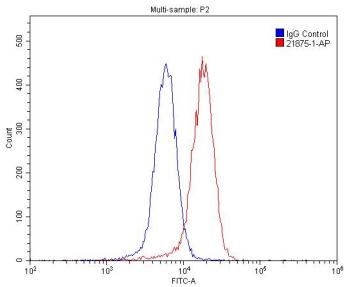

Immunohistochemical analysis of paraffin-embedded mouse brain tissue slide using 21875-1-AP (EphA4 antibody) at dilution of 1:2000 (under 10x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).

Immunohistochemical analysis of paraffin-embedded mouse brain tissue slide using 21875-1-AP (EphA4 antibody) at dilution of 1:2000 (under 40x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).

IP Result of anti-EphA4 (IP:21875-1-AP, 4ug; Detection:21875-1-AP 1:1000) with mouse brain tissue lysate 4000ug.

1X10⁶ SH-SY5Y cells were stained with 0.2ug EphA4 antibody (21875-1-AP, red) and control antibody (blue). Fixed with 4% PFA blocked with 3% BSA (30 min). Alexa Fluor 488-conjugated AffiniPure Goat Anti-Rabbit IgG(H+L) with dilution 1:1500.
