7 Publications

## Informations de base

|  |                                |   |
|--|--------------------------------|---|
| Numéro de catalogue:   | BC137121                       | Méthode de purification:                    |
| 22146-1-AP   |                                | Purification par affinité contre l'antigène |
| Taille:  | 3672                           | Dilutions recommandées:                     |
| 150ul , Concentration: 240 µg/ml by Nanodrop and 207 µg/ml by Bradford method using BSA as the standard; | Nom complet: integrin, alpha 1 | IHC 1:50-1:500                              |
| Hôte:  | MW calculé                     |   |
| Lapin  | 1179 aa, 131 kDa               |   |
| Isotype:   | MW observés:                   |   |
| IgG  | 180 kDa                        |   |
| Immunogen Catalog Number:  |                                |   |
| AG17584  |                                |   |

## Applications

|  |   |
|--|---|
| Applications testées:  | Contrôles positifs:                                     |
| FC, IHC, WB,ELISA  |   |
| Demandes citées:   | IHC : tissu hépatique humain, tissu d'amygdalite humain |
| IF, IHC, WB  |   |
| Spécificité de l'espèce:   |   |
| Humain   |   |
| Espèces citées:  |   |
| Humain, rat  |   |
| <b>Remarque-IHC:</b> il est suggéré de démasquer l'antigène avec un tampon de TE buffer pH 9,0; (*) À défaut, 'le démasquage de l'antigène peut être effectué avec un tampon citrate pH 6,0. |   |

## Informations générales

The integrins are a superfamily of cell adhesion receptors that bind to extracellular matrix ligands, cell-surface ligands, and soluble ligands (PMID: 17543136). They are transmembrane  $\alpha\beta$  heterodimers and at least 24 distinct integrin heterodimers are formed by the combination of 18  $\alpha$  and eight  $\beta$  known subunits (PMID: 17543136; 20029421). In addition to mediating cell adhesion, integrins also play important roles in modulating signal transduction pathways that control cellular responses including migration, proliferation, differentiation, and apoptosis (PMID: 19118207). Integrin alpha-1 (ITGA1, CD49a) combines with the beta 1 subunit (ITGB1, CD29) to form a cell-surface receptor for collagen and laminin. This receptor is involved in cell-cell adhesion and may play a role in inflammation and fibrosis. Integrin alpha-1 is a transmembrane glycoprotein with an apparent molecular weight of 180-250 kDa, larger than the calculated molecular weight of 131 kDa (PMID: 2475259; 3257425; 11557277; 18840653).

## Stockage

### Stockage:

Stocker à -20°C. Stable pendant un an après l'expédition.

### Tampon de stockage:

PBS avec azoture de sodium à 0,02 % et glycérol à 50 % pH 7,3

L'aliquotage n'est pas nécessaire pour le stockage à -20°C

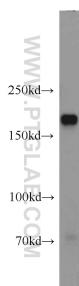

\*\*\* Les 20ul contiennent 0,1% de BSA.

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

## Données de validation sélectionnées

HepG2 cells were subjected to SDS PAGE followed by western blot with 22146-1-AP (ITGA1 antibody) at dilution of 1:1000 incubated at room temperature for 1.5 hours.

$1 \times 10^6$  HeLa cells were stained with 0.2ug Integrin alpha-1 antibody (22146-1-AP, red) and control antibody (blue). Fixed with 90% MeOH blocked with 3% BSA (30 min). Alexa Fluor 488-conjugated AffiniPure Goat Anti-Rabbit IgG(H+L) with dilution 1:1000.
