Anticorps Polyclonal de lapin anti-Angiotensinogen

Numéro de catalogue: 23972-1-AP

1 Publications

Informations de base

Numéro de catalogue:	BC011519	Méthode de purification:
23972-1-AP	Purifié par affinité contre l'antigène	
Taille:	183	Dilutions recommandées:
150ul , Concentration: 300 µg/ml by Nanodrop and 273 µg/ml by Bradford method using BSA as the standard;		WB 1:500-1:2000
Hôte:	angiotensinogen (serpin peptidase inhibitor, clade A, member 8)	IHC 1:50-1:500
Lapin	MW calculé	IF 1:10-1:100
Isotype:	485 aa, 53 kDa	
IgG	MW observés:	
Immunogen Catalog Number:	52 kDa	
AG21121		

Applications

Applications testées:	Contrôles positifs:
FC, IF, IHC, WB, ELISA	WB : plasma humain,
Demandes citées:	IHC : tissu hépatique humain, tissu de cirrhose hépatique humain, tissu rénal humain
IF	IF : cellules HepG2,
Spécificité de l'espèce:	
Humain	
Espèces citées:	
souris	

Remarque-IHC: il est suggéré de démasquer l'antigène avec un tampon de TE buffer pH 9,0; (*) À défaut, 'le démasquage de l'antigène peut être effectué avec un tampon citrate pH 6,0.

Informations générales

Angiotensinogen is a precursor of angiotensin II (Ang II), is expressed and synthesized largely in the liver and is cleaved by the enzyme renin in response to lowered blood pressure. It has a key role in mediating vascular constriction and regulating salt and fluid homeostasis. The resulting product, angiotensin I, is then cleaved by angiotensin converting enzyme (ACE) to generate the physiologically active enzyme angiotensin II. Mutations in this gene are associated with susceptibility to essential hypertension, and can cause renal tubular dysgenesis, a severe disorder of renal tubular development. Defects in this gene have also been associated with non-familial structural atrial fibrillation, and inflammatory bowel disease.

Stockage

Stockage:
Stocker à -20°C. Stable pendant un an après l'expédition.
Tampon de stockage:
PBS avec azoture de sodium à 0,02 % et glycérol à 50 % pH 7,3
L'aliquotage n'est pas nécessaire pour le stockage à -20C

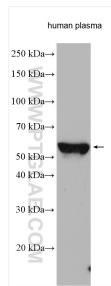

*** Les 20ul contiennent 0,1% de BSA.

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

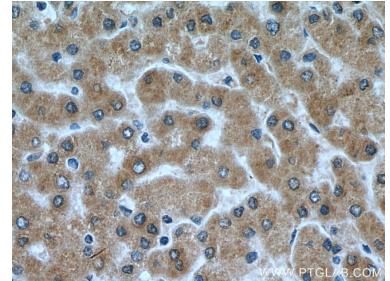

Données de validation sélectionnées

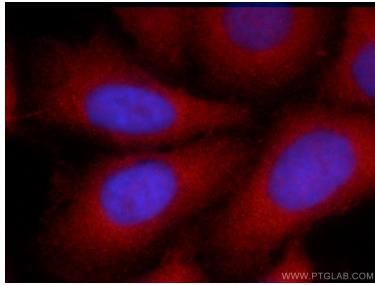

Human plasma were subjected to SDS PAGE followed by western blot with 23972-1-AP (Angiotensinogen antibody) at dilution of 1:1000 incubated at room temperature for 1.5 hours.

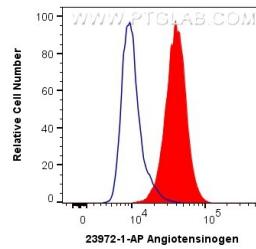

Immunohistochemical analysis of paraffin-embedded human liver tissue slide using 23972-1-AP (Angiotensinogen antibody) at dilution of 1:200 (under 10x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).

Immunohistochemical analysis of paraffin-embedded human liver tissue slide using 23972-1-AP (Angiotensinogen antibody) at dilution of 1:200 (under 40x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).

Immunofluorescent analysis of HepG2 cells using 23972-1-AP (Angiotensinogen antibody) at dilution of 1:25 and Rhodamine-Goat anti-Rabbit IgG.

1X10⁶ HeLa cells were intracellularly stained with 0.4 ug Anti-Human Angiotensinogen (23972-1-AP) and CoraLite®488-Conjugated AffiniPure Goat Anti-Rabbit IgG(H+L) at dilution 1:1000 (red), or 0.4 ug Control Antibody. Cells were fixed with 4% PFA and permeabilized with Flow Cytometry Perm Buffer (PF00011-C).
