Informations générales

FGFBP3 also named as C10orf13 or FGF binding protein 3 is 258 amino acid protein, which belongs to the fibroblast growth factor binding family. FGFBP3 is a secreted protein and may play a role in the regulation of gene transcription. The molecular weight of FGFBP3 is 29kDa, but our results detected the 60-65kDa protein by western blot. We infer that FGFBP3 may exist as dimer.
