45 Publications

Informations de base

Numéro de catalogue:	BC068522	Méthode de purification:
24909-1-AP		Purification par affinité contre l'antigène
Taille:	Identification du gène (NCBI):	Dilutions recommandées:
150ul , Concentration: 1200 µg/ml by Nanodrop and 733 µg/ml by Bradford method using BSA as the standard;	3725	WB 1:1000-1:6000 IHC 1:20-1:200 IF 1:10-1:100
Hôte:	Nom complet:	
Lapin	jun oncogene	
Isotype:	MW calculé	
IgG	331 aa, 36 kDa	
Immunogen Catalog Number:	MW observés:	
AG17639	39 kDa	

Applications

Applications testées:	Contrôles positifs:
IF, IHC, WB, ELISA	WB : UV treated HeLa cells, cellules C6, cellules HEK-293, cellules HeLa, cellules HepG2, cellules NIH/3T3, cellules NIH/3T3 traitées au UV
Demandes citées:	IHC : tissu de cancer du col de l'utérus humain, tissu de cancer du sein humain
ChIP, CoIP, IF, IHC, IP, WB	IF : cellules NIH/3T3,
Spécificité de l'espèce:	
Humain, souris, Hamster	
Espèces citées:	
Humain, rat, souris	

Remarque-IHC: il est suggéré de démasquer l'antigène avec un tampon de TE buffer pH 9,0; (*) À défaut, 'le démasquage de l'antigène peut être 'effectué avec un tampon citrate pH 6,0.

Informations générales

JUN is also named as c-Jun and AP1, belongs to the bZIP family and Jun subfamily. JUN, the most extensively studied protein of the activator protein-1 (AP-1) complex, is involved in numerous cell activities, such as proliferation, apoptosis, survival, tumorigenesis and tissue morphogenesis [PMID: 22180088]. JUN is a transcription factor that recognizes and binds to the enhancer heptamer motif 5'-TGA[CG]TCA-3'. It promotes activity of NR5A1 when phosphorylated by HIPK3 leading to increased steroidogenic gene expression upon cAMP signaling pathway stimulation. JUN is a basic leucine zipper (bZIP) transcription factor that acts as homo- or heterodimer, binding to DNA and regulating gene transcription [PMID: 9732876]. In addition, extracellular signals can induce post-translational modifications of JUN, resulting in altered transcriptional activity and target gene expression [PMID: 8464713]. Moreover, it has uncovered multiple layers of a complex regulatory scheme in which JUN is able to crosstalk, amplify and integrate different signals for tissue development and disease. Jun is predominantly nuclear, ubiquitinated Jun colocalizes with lysosomal proteins [PMID: 15469925]. This antibody is a rabbit polyclonal antibody raised against a region of human JUN. Both phosphorylated (p-c-Jun) and unphosphorylated forms of c-Jun, with sizes of 42-45 kDa and 36-39 kDa, respectively are obtained in some experiments. (PMID: 17210646)

Stockage

Stockage:

Stocker à -20°C. Stable pendant un an après l'expédition.

Tampon de stockage:

PBS avec azoture de sodium à 0,02 % et glycérol à 50 % pH 7,3

L'aliquotage n'est pas nécessaire pour le stockage à -20°C

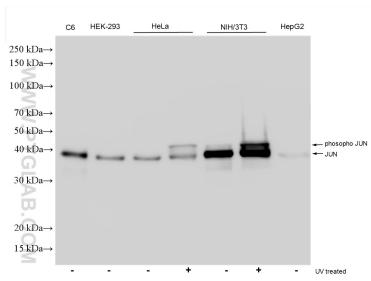

*** Les 20ul contiennent 0,1% de BSA.

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Données de validation sélectionnées

Various lysates were subjected to SDS PAGE followed by western blot with 24909-1-AP (JUN antibody) at dilution of 1:3000 incubated at room temperature for 1.5 hours.
