Informations générales

MPZL3 (Myelin protein zero-like protein 3) is a member of the myelin P0 protein family. The human MPZL3 gene is located at chromosome 11q23.3, and encodes a 235-amino acid polypeptide with an Immunoglobulin V-type (IgV) domain. MPZL3 protein is a membrane adhesion protein. It may be involved in immune function (PMID: 19054061). This polyclonal antibody raised against 32-235aa of human MPZL3 reveals bands of 28 kDa and 70 kDa, which could be endogenous MPZL3 of unmodified form and post-translational modified form, respectively (PMID: 17273165).
