Informations générales

SLC40A1, also named as Ferroportin 1 (FPN1), is an iron transporter which is involved in iron export from duodenal epithelial cell and also in transfer of iron between maternal and fetal circulation. It has been reported that SLC40A1 mutations may lead to macrophage iron overload, hyperferritinemia, and normal transferrin saturation among ferroportin iron overload patients. This antibody detects 62-70 kDa protein as well as the fragments of 56 kDa and 35 kDa protein similar to papers in SDS-PAGE. (PMID: 21396368, 16054062, 18974313)
