Anticorps Polyclonal de lapin anti-eRF3a/GSPT1

Numéro de catalogue: 28130-1-AP

Informations de base

Numéro de catalogue:	BC009503	Méthode de purification:
28130-1-AP	Identification du gène (NCBI):	Purification par affinité contre l'antigène
Taille:	2935	Dilutions recommandées:
150ul , Concentration: 500 µg/ml by Nanodrop;	Nom complet:	WB 1:1000-1:4000 IF 1:200-1:800
Hôte:	G1 to S phase transition 1	
Lapin	MW calculé	
Isotype:	68 aa, 4 kDa	
IgG	MW observés:	
Immunogen Catalog Number:	80 kDa	
AG27963		

Applications

Applications testées:	Contrôles positifs:
IF, WB, ELISA	WB : cellules A549, cellules HeLa, cellules PC-3,
Spécificité de l'espèce:	cellules SKOV-3
Humain, rat, souris	IF : cellules HeLa,

Informations générales

The eukaryotic Release Factor 3 (eRF3) is a GTPase that associates with eRF1 in a complex that mediates translation termination. Eukaryotic release factor 3 (eRF3) has many functions in eukaryotic cells, such as controlling the regulation of the cell cycle at the G1 to S phase transition, and regulating protein synthesis as a GTP dependent stimulator of eRF1 in translation termination. It was also reported to play a key role as an initiator of the mRNA degradation machinery in the recycling of ribosomes in successive cycles of translation, and probably also in transcription regulation. eRF3a, also known as GSPT1, is one subunit of eRF3 (PMID:15917414,12923185). It involves in translation termination in response to the termination codons UAA, UAG and UGA and stimulates the activity of eRF1. eRF3a/GSPT1 exists some isoforms with MW 69 kDa and 56 kDa. Identification of a processed form of eRF3a/GSPT1 as a BIR3-binding protein-Using a GST-BIR3 fusion protein as an affinity reagent to purify new IAP binding proteins from extracts of human cells and mouse tissues, we previously isolated 3 proteins of molecular weights 23, 38 and 80 kDa. 80 kDa band confirmed that it is a processed form of the human GSPT1/eRF3a protein, lacking the first 69 residues(PMID: 12865429).

Stockage

Stockage:
Stocker à -20°C. Stable pendant un an après l'expédition.
Tampon de stockage:
PBS avec azoture de sodium à 0,02 % et glycérol à 50 % pH 7,3
L'aliquotage n'est pas nécessaire pour le stockage à -20C

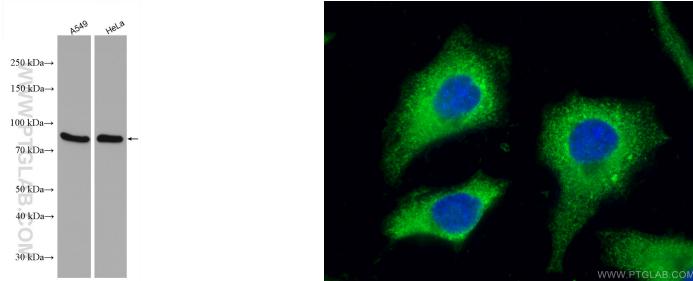

*** Les 20ul contiennent 0,1% de BSA.

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Données de validation sélectionnées

A549 cells were subjected to SDS PAGE followed by western blot with 28130-1-AP (eRF3a/GSPT1 antibody) at dilution of 1:2000 incubated at room temperature for 1.5 hours.

Immunofluorescent analysis of (-20°C Ethanol) fixed HeLa cells using eRF3a/GSPT1 antibody (28130-1-AP) at dilution of 1:400 and Coralite®488-Conjugated AffiniPure Goat Anti-Rabbit IgG(H+L).
