Anticorps Monoclonal anti-MYC-tag

Numéro de catalogue: 60003-1-Ig **21 Publications**

Informations de base

Numéro de catalogue:
60003-1-Ig
Taille:
150ul
Hôte:
Mouse
Isotype:
IgG1

Numéro d'acquisition GenBank:
Identification du gène (NCBI):
Nom complet:

Méthode de purification:
N/A

Applications

Applications testées:
ELISA
Demandes citées:
IF, IP, WB
Spécificité de l'espèce:
Protéine recombinante

Informations générales

Protein tags are protein or peptide sequences located either on the C- or N- terminal of the target protein, which facilitates one or several of the following characteristics: solubility, detection, purification, localization and expression. The c-Myc tag corresponds to amino acid residues(EQKLISEEDL) of the human c-Myc protein. It can be used for affinity chromatography, then used to separate recombinant, overexpressed protein from wild type protein expressed by the host organism. It can also be used in the isolation of protein complexes with multiple subunits. Myc-Tag mouse mAb detects recombinant proteins containing the Myc tag. The antibody recognizes the Myc-tag EQKLISEEDL fused to either the amino- or carboxy- terminus of targeted proteins.

Publications notables

Autrice	Pubmed ID	Journal	Application
Yajie Chen	31570706	Cell Death Dis

Stockage

Stockage:
Stocker à -20°C. Stable pendant un an après l'expédition.
Tampon de stockage:
PBS avec azoture de sodium à 0,02 % et glycérol à 50 % pH 7,3
L'aliquotage n'est pas nécessaire pour le stockage à -20C

*** Les 20ul contiennent 0,1% de BSA.
