# Anticorps Monoclonal anti-Phospho-Akt (Tyr315)

Numéro de catalogue: 60072-1-Ig    12 Publications

## Informations de base

Numéro de catalogue:	60072-1-Ig	Numéro d'acquisition GenBank:	NM_005163	Méthode de purification:	Purification par protéine A
Taille:	100ul , Concentration: 747 µg/ml by Bradford method using BSA as the standard;	Identification du gène (NCBI):	207	CloneNo.:	5C4D12
Hôte:	Mouse	Nom complet:	v-akt murine thymoma viral oncogene homolog 1		
Isotype:	IgG2b	MW calculé	56 kDa		
		MW observés:	62 kDa		

## Applications

Applications testées:

ELISA

Demandes citées:

IF, WB

Spécificité de l'espèce:

Humain, souris

Espèces citées:

Humain, rat

## Informations générales

Protein kinase B (PKB/Akt) has been well established as an important signaling intermediate, and its deregulation has been implicated in the development of human cancer and diabetes(PMID:12176337). Akt, also known as protein kinase B (PKB), is a serine/threonine kinase activated downstream of class I phosphatidylinositol 3-kinase (PI3K) and various receptors. It has emerged as the key regulator for many signal transduction pathways, modulating multiple processes such as cell survival, proliferation, growth, angiogenesis, and glucose metabolism(PMID:16139227). Its deregulation has been implicated in the development of human cancer and diabetes(PMID:12176337).

## Publications notables

Autrice	Pubmed ID	Journal	Application

## Stockage

Stockage:

Stocker à -20°C. Stable pendant un an après l'expédition.

Tampon de stockage:

PBS avec azoture de sodium à 0,02 % et glycérol à 50 % pH 7,3

L'aliquotage n'est pas nécessaire pour le stockage à -20°C

\*\*\* Les 20ul contiennent 0,1% de BSA.
