Anticorps Monoclonal anti-CRP

Numéro de catalogue: 66250-1-Ig 7 Publications

Informations de base

Numéro de catalogue:	BC020766	Méthode de purification:
66250-1-Ig		Purification par protéine A
Taille:	Identification du gène (NCBI):	CloneNo.:
150ul , Concentration: 3200 µg/ml by 1401	Nom complet:	3F10A11
Nanodrop and 1600 µg/ml by Bradford method using BSA as the standard;	C-reactive protein, pentraxin-related	Dilutions recommandées:
Hôte:	MW calculé	WB 1:2000-1:10000
Mouse	224 aa, 25 kDa	IHC 1:50-1:500
Isotype:	MW observés:	IF 1:50-1:500
IgG2a	27 kDa	
Immunogen Catalog Number:		
AG9883		

Applications

Applications testées:	Contrôles positifs:
IF, IHC, WB,ELISA	WB : sérum de souris injecté avec des bactéries, sérum de souris injecté avec le tissu bactérien, tissu hépatique de porc, tissu hépatique de rat
Demandes citées:	IHC : tissu hépatique humain,
IF, IHC, WB	IF : tissu hépatique humain,
Spécificité de l'espèce:	
Humain, porc, rat, souris	
Espèces citées:	
Humain, rat, singe, souris	
<i>Remarque-IHC: il est suggéré de démasquer l'antigène avec un tampon de TE buffer pH 9,0; (*) À défaut, 'le démasquage de l'antigène peut être effectué avec un tampon citrate pH 6,0.</i>	

Informations générales

C-reactive protein (CRP) is an acute-phase serum protein synthesized by the liver in response to interleukin-6 (IL-6) during inflammation. The name of CRP derives from its ability to react with the C polysaccharide of Streptococcus pneumoniae. CRP is an annular, pentameric protein that belongs to the pentraxin family of proteins. CRP displays several functions associated with host defense: it promotes agglutination, bacterial capsular swelling, phagocytosis and complement fixation through its calcium-dependent binding to phosphorylcholine. It is used mainly as a marker of inflammation.

Stockage

Stockage:

Stocker à -20°C. Stable pendant un an après l'expédition.

Tampon de stockage:

PBS avec azoture de sodium à 0,02 % et glycérol à 50 % pH 7,3

L'aliquotage n'est pas nécessaire pour le stockage à -20C

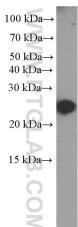

*** Les 20ul contiennent 0,1% de BSA.

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

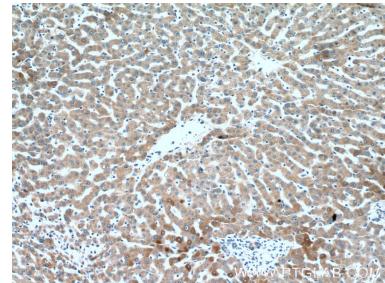

Données de validation sélectionnées

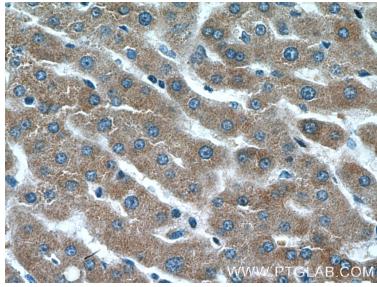

Serum from mouse injected with bacteria were subjected to SDS PAGE followed by western blot with 66250-1-Ig (CRP Antibody) at dilution of 1:2000. Horseradish peroxidase conjugated protein A was used for signal developing instead of secondary antibody incubated at room temperature for 1.5 hours.

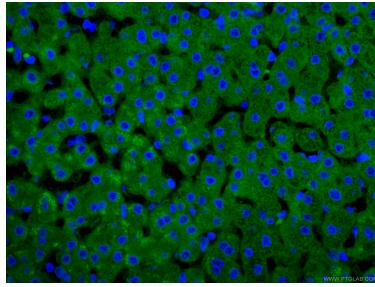

Serum from normal mouse (left) and mouse injected with bacteria (right) were subjected to SDS PAGE followed by western blot with 66250-1-Ig (CRP Antibody) at dilution of 1:1000. Horseradish peroxidase conjugated protein A was used for signal developing instead of secondary antibody incubated at room temperature for 1.5 hours.

Immunohistochemical analysis of paraffin-embedded human liver tissue slide using 66250-1-Ig (CRP Antibody) at dilution of 1:200 (under 10x lens).

Immunohistochemical analysis of paraffin-embedded human liver tissue slide using 66250-1-Ig (CRP Antibody) at dilution of 1:200 (under 40x lens).

Immunofluorescent analysis of (4% PFA) fixed human liver tissue using 66250-1-Ig (CRP antibody) at dilution of 1:100 and Coralite488-Conjugated AffiniPure Goat Anti-Mouse IgG(H+L).
