# Anticorps Monoclonal anti-HYAL1

Numéro de catalogue: 66560-1-Ig

## Informations de base

Numéro de catalogue:	Numéro d'acquisition GenBank:	Méthode de purification:
66560-1-Ig	BC035695	Purification par protéine G
Taille:	Identification du gène (NCBI):	CloneNo.:
150ul , Concentration: 1493 µg/ml by 3373	Nom complet:	1B8B5
Nanodrop and 1000 µg/ml by Bradford method using BSA as the standard;	hyaluronoglucosaminidase 1	Dilutions recommandées:
Hôte:	MW calculé	WB 1:1000-1:4000
Mouse	435 aa, 48 kDa	
Isotype:	MW observés:	
IgG1	60 kDa	
Immunogen Catalog Number:		
AG18183		

## Applications

Applications testées:	Contrôles positifs:
WB,ELISA	WB : cellules HepG2, cellules DU 145, cellules LNCaP,
Spécificité de l'espèce:	cellules NCCIT, cellules PC-3
Humain, rat	

## Informations générales

Hyaluronic acid (HA) is a glycosaminoglycan that is believed to have numerous important biologic functions, including modulation of cell proliferation, migration, and differentiation, as well as the regulation of extracellular water and protein homeostasis. It is also an integral structural component of cartilage and other tissues and acts as a lubricant in joints. Hyaluronidases are a family of enzymes that catalyse the degradation of HA. In humans, there are five functional hyaluronidases: HYAL1, HYAL2, HYAL3, HYAL4 and HYAL5 (also known as SPAM1 or PH-20); plus a pseudogene, HYAL6 (also known as HYALP1). HYAL-1 is present in many tissues and is predominantly found in the plasma and urine (PMID: 16600643). In addition to its function in normal cellular hyaluronan turnover, human HYAL-1 is implicated in cancer proliferation, angiogenesis, and inflammatory diseases (PMID: 17503783).

## Stockage

Stockage:  
Stocker à -20°C. Stable pendant un an après l'expédition.  
Tampon de stockage:  
PBS avec azoture de sodium à 0,02 % et glycérol à 50 % pH 7,3  
L'aliquotage n'est pas nécessaire pour le stockage à -20C

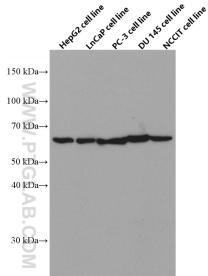

\*\*\* Les 20ul contiennent 0,1% de BSA.

W: ptglab.com

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

## Données de validation sélectionnées

HepG2, LNCaP, PC-3, DU 145, and NCCIT cells were subjected to SDS PAGE followed by western blot with 66560-1-Ig (HYAL1 antibody) at dilution of 1:2000 incubated at room temperature for 1.5 hours.
