Informations de base

Numéro de catalogue:	66610-1-Ig	Numéro d'acquisition GenBank:	BC074890	Méthode de purification:	Purification par protéine A
Taille:	150ul , Concentration: 2000 µg/ml by 8600 Nanodrop and 1000 µg/ml by Bradford method using BSA as the standard;	Identification du gène (NCBI):	Nom complet: tumor necrosis factor (ligand) superfamily, member 11	CloneNo.:	3F2E1
Hôte:	Mouse	MW calculé	317 aa, 35 kDa	Dilutions recommandées:	WB 1:2000-1:10000 IF 1:400-1:1600
Isotype:	IgG1	MW observés:	35-38 kDa		
Immunogen Catalog Number:	AG19975				

Applications

Applications testées:	IF, WB, ELISA	Contrôles positifs:	
Demandes citées:	IF, IHC, WB	WB :	cellules COLO 320, cellules DC2.4, cellules HeLa, cellules HUVEC, cellules JAR, cellules NCCIT, cellules RAW 264.7, cellules U2OS, tissu splénique humain
Spécificité de l'espèce:	Humain, rat, souris	IF :	cellules MCF-7,
Espèces citées:	Humain, souris		

Informations générales

TNFSF11 also known as RANKL, is a member of the tumor necrosis factor (TNF) cytokine family which is a ligand for osteoprotegerin and functions as a key factor for osteoclast differentiation and activation. RANKL is a polypeptide of 217 amino acids that exerts its biological activity both in a transmembrane form of about 40-45 kDa and in soluble one of 31 kDa (PMID: 15308315). The membrane-bound RANKL (mRANKL) is cleaved into a sRANKL by the metalloprotease-disintegrin TNF-alpha convertase (TACE) or a related metalloprotease (MP). RANKL induces osteoclast formation through its receptor, RANK, which transduces signals by recruiting adaptor molecules, such as the TNF receptor-associated factor (TRAF) family of proteins. RANKL was shown to be a dendritic cell survival factor and is involved in the regulation of T cell-dependent immune response. T cell activation was reported to induce expression of this gene and lead to an increase of osteoclastogenesis and bone loss. RANKL was shown to activate antiapoptotic kinase AKT/PKB through a signaling complex involving SRC kinase and tumor necrosis factor receptor-associated factor (TRAF) 6, which indicated this protein may have a role in the regulation of cell apoptosis.

Stockage

Stockage:

Stocker à -20°C. Stable pendant un an après l'expédition.

Tampon de stockage:

PBS avec azoture de sodium à 0,02 % et glycérol à 50 % pH 7,3

L'aliquotage n'est pas nécessaire pour le stockage à -20C

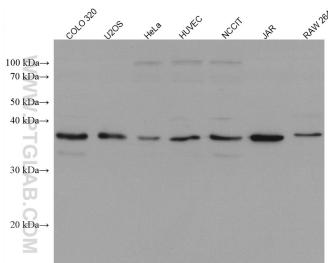

*** Les 20ul contiennent 0,1% de BSA.

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

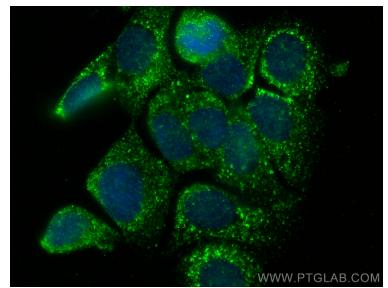

Données de validation sélectionnées

Various lysates were subjected to SDS PAGE followed by western blot with 66610-1-Ig (RANKL antibody) at dilution of 1:5000 incubated at room temperature for 1.5 hours.

WB result of RANKL antibody (66610-1-Ig; 1:6000; incubated at room temperature for 1.5 hours) with sh-Control and sh-RANKL transfected HeLa cells.

Immunofluorescent analysis of (4% PFA) fixed MCF-7 cells using RANKL antibody (66610-1-Ig, Clone: 3F2E1) at dilution of 1:800 and Coralite® 488-Conjugated AffiniPure Goat Anti-Mouse IgG(H+L).
