## Informations générales

SIRP Beta 1 is a member of the signal-regulatory-protein (SIRP) family, and also belongs to the immunoglobulin superfamily. SIRP family members are cell surface signaling receptors differentially expressed in leukocytes and the central nervous system. SIRP Beta 1 interacts with TYROBP/DAP12, a protein bearing immunoreceptor tyrosine-based activation motifs. SIRP Beta 1 also participates in the recruitment of tyrosine kinase SYK.

## Données de validation sélectionnées

Various lysates were subjected to SDS PAGE followed by western blot with 68206-1-Ig (SIRP Beta 1 antibody) at dilution of 1:20000 incubated at room temperature for 1.5 hours. The membrane was stripped and reblotted with HRP-conjugated GAPDH Monoclonal antibody (HRP-60004) as loading control.
