Anticorps Monoclonal anti-eRF3a/GSPT1

Numéro de catalogue: 68217-1-Ig

Informations de base

Numéro de catalogue:	BC009503	Méthode de purification:
68217-1-Ig		Purification par protéine A
Taille:	Identification du gène (NCBI):	CloneNo.:
150ul , Concentration: 1000 µg/ml by Nanodrop;	2935	2A3H6
Hôte:	Nom complet:	Dilutions recommandées:
Mouse	G1 to S phase transition 1	WB 1:5000-1:50000
Isotype:	MW calculé	
IgG2a	68 aa, 4 kDa	
Immunogen Catalog Number:	MW observés:	
AG27986	80-85 kDa	

Applications

Applications testées:	WB, ELISA	Contrôles positifs:
Spécificité de l'espèce:	Humain, porc, rat, souris	WB : cellules HCT 116, cellules COLO 320, cellules HeLa, cellules HSC-T6, cellules Jurkat, cellules K-562, cellules LNCaP, cellules NIH/3T3, tissu cérébral de porc

Informations générales

The eukaryotic Release Factor 3 (eRF3) is a GTPase that associates with eRF1 in a complex that mediates translation termination. Eukaryotic release factor 3 (eRF3) has many functions in eukaryotic cells, such as controlling the regulation of the cell cycle at the G1 to S phase transition, and regulating protein synthesis as a GTP dependent stimulator of eRF1 in translation termination. It was also reported to play a key role as an initiator of the mRNA degradation machinery in the recycling of ribosomes in successive cycles of translation, and probably also in transcription regulation. eRF3a, also known as GSPT1, is one subunit of eRF3 (PMID: 15917414, 12923185). It involves in translation termination in response to the termination codons UAA, UAG and UGA and stimulates the activity of eRF1. eRF3a/GSPT1 exists some isoforms with MW 69 kDa and 56 kDa. Identification of a processed form of eRF3a/GSPT1 as a BIR3-binding protein-Using a GST-BIR3 fusion protein as an affinity reagent to purify new IAP binding proteins from extracts of human cells and mouse tissues, we previously isolated 3 proteins of molecular weights 23, 38 and 80 kDa. 80 kDa band confirmed that it is a processed form of the human GSPT1/eRF3a protein, lacking the first 69 residues(PMID: 12865429).

Stockage

Stockage:
Stocker à -20°C. Stable pendant un an après l'expédition.
Tampon de stockage:
PBS avec azoture de sodium à 0,02 % et glycérol à 50 % pH 7,3
L'aliquotage n'est pas nécessaire pour le stockage à -20°C

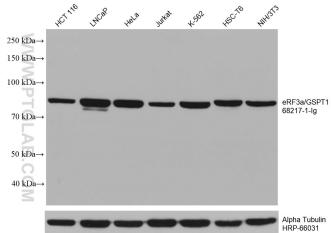

*** Les 20ul contiennent 0,1% de BSA.

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Données de validation sélectionnées

Various lysates were subjected to SDS PAGE followed by western blot with 68217-1-Ig (eRF3a/GSPT1 antibody) at dilution of 1:20000 incubated at room temperature for 1.5 hours. The membrane was stripped and reblotted with HRP-conjugated Alpha Tubulin Monoclonal antibody (HRP-66031) as loading control.
