Anticorps Monoclonal anti-IL-4

Numéro de catalogue:[APC-65074](#)

Informations de base

Numéro de catalogue:	BC027514	Méthode de purification:
APC-65074		Purification par affinité
Taille:	16189	CloneNo.:
100ug , 0.2 mg/ml		11B11
Hôte:	Nom complet:	Excitation/Emission maxima
Rat	interleukin 4	wavelengths:
Isotype:		650 nm / 660 nm
IgG1		

Applications

Applications testées:
FC (Intra)

Spécificité de l'espèce:
souris

Informations générales

Interleukin-4 (IL-4), a member of the α -helical cytokine family, is produced by activated CD4+ T cells, basophils, and mast cells. It promotes the proliferation and differentiation of antigen presenting cells. IL-4 also plays a pivotal role in antibody isotype switching and stimulates the production of IgE. This cytokine has been applied in the treatment of autoimmune disorder like multiple myeloma, cancer, psoriasis, and arthritis. IL-4 has also been extensively applied to inhibit detrimental effect of Th1. It may promote the growth of epithelial tumors by mediating increased proliferation and survival. (PMID: 24489573;3049907;21663408)

Stockage

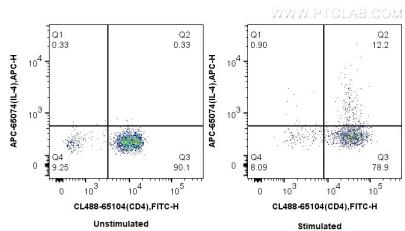

Stockage:
Store at 2-8°C. Avoid exposure to light. Stable for one year after shipment.

Tampon de stockage:
Tampon à base de phosphate avec azoture de sodium à 0,09 % et gélatine à 0,1 %, pH 7,2.

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Données de validation sélectionnées

1X10⁶ unstimulated or PMA and ionomycin stimulated (in the presence of protein transport inhibitors) mouse Th2-polarized splenocytes were surface stained with 0.25 ug Coralite®488 Anti-Mouse CD4 (GK1.5) (CL488-65104, Clone: GK1.5). Cells were fixed with 4% PFA and permeabilized with Flow Cytometry Perm Buffer (PF00011-C), and then intracellularly stained with 0.25 ug APC Anti-Mouse IL-4 (APC-65074, Clone: 11B11).
