Anticorps Monoclonal anti-CD80 (B7-1)

Numéro de catalogue: **APC-65076**

2 Publications

Informations de base

Numéro de catalogue:	BC131959	Méthode de purification:
APC-65076	Purification par affinité	
Taille:	12519	CloneNo.:
100ug , 0.2 mg/ml	16-10A1	
Hôte:	Nom complet:	Excitation/Emission maxima
Armenian Hamster	CD80 antigen	wavelengths:
Isotype:		650 nm / 660 nm
IgG		

Applications

Applications testées:
FC

Demandes citées:
FC

Spécificité de l'espèce:
souris

Espèces citées:
souris

Informations générales

CD80 (also known as B7-1) is a type I membrane protein that is a member of the immunoglobulin superfamily, with an extracellular immunoglobulin constant-like domain and a variable-like domain required for receptor binding. It is expressed on antigen-presenting cells (APCs), including B cells, dendritic cells, monocytes, and macrophages. CD80 is the receptor for the proteins CD28 and CTLA-4 found on the surface of T-cells. It is involved in the costimulatory signal essential for T-lymphocyte activation. T-cell proliferation and cytokine production is induced by the binding of CD28, binding to CTLA-4 has opposite effects and inhibits T-cell activation. CD80 also acts as a cellular attachment receptor for adenovirus subgroup B. (PMID: 7545666; 12015893; 16920215)

Stockage

Stockage:
Stocker à une température comprise entre 2 °C et 8 °C. Éviter toute exposition à la lumière.

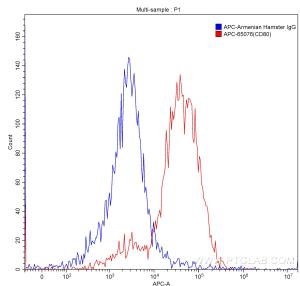

Tampon de stockage:
Tampon à base de phosphate avec azoture de sodium à 0,09 % et gélatine à 0,1 %, pH 7,2.

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Données de validation sélectionnées

1X10⁶ BALB/c mouse peritoneal macrophages were surface stained with 0.20 ug APC-Anti-Mouse CD80 (B7-1) (APC-65076, clone 16-10A1) (red) or 0.20 ug APC-Armenian Hamster IgG isotype control (blue). Cells were not fixed.
