# Anticorps Polyclonal de lapin anti-NF- kB p65

proteintech®  
Antibodies | ELISA kits | Proteins  
[www.ptglab.com](http://www.ptglab.com)

Numéro de catalogue:**CL488-10745** Phare

## Informations de base

Numéro de catalogue:	BC011603	Méthode de purification:
CL488-10745		Purification par affinité contre l'antigène
Taille:	Identification du gène (NCBI):	Dilutions recommandées:
1000 μl, Concentration: 1000 μg/ml by Nanodrop;	5970	IF 1:50-1:500
Hôte:	Nom complet:	Excitation/Emission maxima wavelengths:
Lapin	v-rel reticuloendotheliosis viral oncogene homolog A (avian)	493 nm / 522 nm
Isotype:	MW calculé	
IgG	65 kDa	
Immunogen Catalog Number:	MW observés:	
AG1199	65 kDa	

## Applications

Applications testées:	Contrôles positifs:
IF	IF : cellules HepG2,
Spécificité de l'espèce:	
Humain, porc, rat, souris	

## Informations générales

Nuclear factor k B (NF-kB) is a sequence-specific DNA-binding protein complex which regulates the expression of viral genomes, including the human immunodeficiency virus, and a variety of cellular genes, particularly those involved in immune and inflammatory responses. The members of the NF-kB family in mammalian cells include the proto-oncogene c-Rel, p50/p105 (NFκB1), p65 (RelA), p52/p100 (NFκB2), and RelB. All of these proteins share a conserved 300-amino acid region known as the Rel homology domain which is responsible for DNA binding, dimerization, and nuclear translocation of NF-kB. The p65 subunit is a major component of NF-kB complexes and is responsible for trans-activation. NF-kB heterodimeric p65-p50 and p65-c-Rel complexes are transcriptional activators. The NF-kB p65-p65 complex appears to be involved in invasin-mediated activation of IL-8 expression. The inhibitory effect of IκB upon NF-kB in the cytoplasm is exerted primarily through the interaction with p65. p65 shows a weak DNA-binding site which could contribute directly to DNA binding in the NF-kB complex. It associates with chromatin at the NF-kB promoter region via association with DDX1. This antibody is a rabbit polyclonal antibody raised against residues near the N terminus of human RELA.

## Stockage

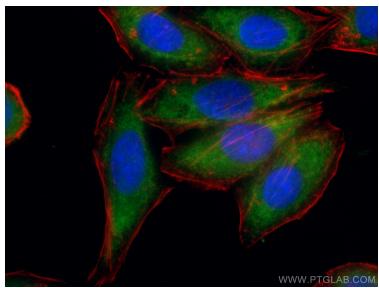

Stockage:  
Stocker à -20 °C. Éviter toute exposition à la lumière.  
Tampon de stockage:  
PBS avec glycérol à 50 %, Proclin300 à 0,05 % et BSA à 0,5 %, pH 7,3.  
L'aliquotage n'est pas nécessaire pour le stockage à -20°C

\*\*\* Les 20ul contiennent 0,1% de BSA.

W: [ptglab.com](http://ptglab.com)

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

## Données de validation sélectionnées

Immunofluorescent analysis of (-20°C Methanol) fixed HepG2 cells using CoraLite® Plus 488 NF-κB p65 antibody (CL488-10745, green) at dilution of 1:100, CoraLite®594 Beta Actin antibody (CL594-66009, Clone: 2D4H5, red). DAPI (blue).
