Anticorps Monoclonal anti-acetylated Tubulin(Lys40)

Numéro de catalogue: CL488-66200

2 Publications

Informations de base

Numéro de catalogue:	Numéro d'acquisition GenBank:	Méthode de purification:
CL488-66200	NM_006009	Purification par protéine G
Taille:	Identification du gène (NCBI):	CloneNo.:
100ul , Concentration: 1000 µg/ml by Nanodrop and 1000 µg/ml by Bradford method using BSA as the standard;	7846 Nom complet: tubulin, alpha 1a	7E5H8
Hôte:	MW calculé	Dilutions recommandées:
Mouse	52 kDa	IF 1:50-1:500
Isotype:		Excitation/Emission maxima wavelengths:
IgG1		493 nm / 522 nm

Applications

Applications testées:	Contrôles positifs:
IF	IF : cellules MDCK, tissu rénal de souris
Demandes citées:	
IF	
Spécificité de l'espèce:	
canin, Humain, porc, rat, souris	
Espèces citées:	
Humain	

Informations générales

Tubulin, composed of heterodimers of alpha and beta tubulin, is the main component of microtubules which play important roles in cell motility, mitosis, and intracellular vesicle transport. Both alpha and beta tubulin undergo several posttranslational modifications such as polyglutamylation and acetylation/deacetylation. Tubulin acetylation occurs on lysine-40 at the N-terminal of alpha tubulin and is conserved across species. The histone deacetylase HDAC6 and SIRT2 has been identified as tubulin deacetylases. Reversible acetylation of alpha tubulin may be implicated in regulating microtubule stability, cell motility, and axon regeneration. The level of acetylated tubulin has been linked to epithelial malignancies and sensitivity to chemotherapy. In addition, acetylated tubulin has been widely used as a marker for primary cilia. This antibody is specific to the acetylated tubulin; it does not recognize non-acetylated tubulin. (24268707, 23881549). This antibody is conjugated with CL488, Ex/Em 488 nm/515 nm.

Stockage

Stockage:
Stocker à -20 °C. Éviter toute exposition à la lumière. Stable pendant un an après l'expédition.
Tampon de stockage:
PBS avec glycérol à 50 %, Proclin300 à 0,05 % et BSA à 0,5 %, pH 7,3.
L'aliquotage n'est pas nécessaire pour le stockage à -20°C

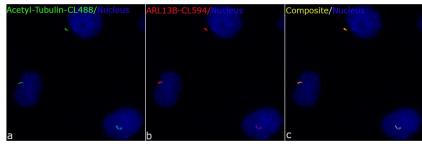

*** Les 20ul contiennent 0,1% de BSA.

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Données de validation sélectionnées

Immunofluorescent analysis of (4% PFA) fixed MDCK cells using CL488-66200 (GREEN, acetylated Tubulin(Lys40) antibody) at dilution of 1:50 and CL594-17711 (RED, ARL13B antibody) at dilution of 1:50.

Frozen tissue section of adult mouse kidney was stained for acetylated α -tubulin (magenta, Cat. No CL488-66200), CD-31/PECAM-1 (white), and Shh (green, Cat. No 20697-1-AP) with DAPI as a counterstain for visualizing the nucleus (blue). acetylated α -tubulin stains primary cilia and was conjugated to Coralite-488 fluorescent dye and pseudocolored to magenta. CD-31 stains endocardial/endothelial cells and was visualized with an Alexa Fluor 647 secondary
