# Anticorps Monoclonal anti-MAD2L2

Numéro de catalogue:**CL488-67100**

## Informations de base

|  |  |                             |
|--|--|-----------------------------|
| Numéro de catalogue:                           | BC015244                                     | Méthode de purification:    |
| CL488-67100                                    |  | Purification par protéine A |
| Taille:  | Identification du gène (NCBI):               | CloneNo.:                   |
| 100ul , Concentration: 1000 µg/ml by Nanodrop; | 10459  | 2A4C2                       |
| Hôte:  | Nom complet:                                 | Excitation/Emission maxima  |
| Mouse  | MAD2 mitotic arrest deficient-like 2 (yeast) | wavelengths:                |
| Isotype:                                       | MW calculé                                   | 493 nm / 522 nm             |
| IgG2b  | 211 aa, 24 kDa                               |                             |
| Immunogen Catalog Number:                      | MW observés:                                 |                             |
| AG28233  | 24 kDa                                       |                             |

## Applications

Applications testées:

FC (Intra)

Spécificité de l'espèce:

Humain, rat, souris

## Informations générales

MAD family, together with BUB and Mps1,Cdc20k, play roles in the mitotic spindle checkpoint. MAD2L2 is one of the MAD family. It can mediate the second polymerase switching in translation DNA synthesis by mediating the interaction between the error-prone DNA polymerase zeta catalytic subunit REV3L and the inserter polymerase REV1. Through regulation of the JNK-mediate phosphorylation and activation of the transcriptional activator ELK1, MAD2L2 involves in cellular response to DNA damage. Also it has role in the progression of cell cycle and peithelial-mesenchymal transdifferentiation.

## Stockage

Stockage:

Stocker à -20 °C. Éviter toute exposition à la lumière. Stable pendant un an après l'expédition.

Tampon de stockage:

PBS avec glycérol à 50 %, Proclin300 à 0,05 % et BSA à 0,5 %, pH 7,3.

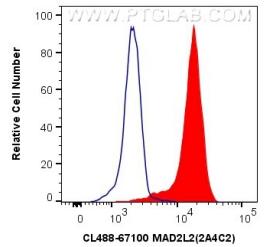

L'aliquotage n'est pas nécessaire pour le stockage à -20°C

\*\*\* Les 20ul contiennent 0,1% de BSA.

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

## Données de validation sélectionnées

1X10<sup>6</sup> K-562 cells were intracellularly stained with 0.8 ug Coralite® Plus 488 Anti-Human MAD2L2 (CL488-67100, Clone:2A4C2) (red), or 0.8 ug Coralite® Plus 488 Mouse IgG2b Isotype Control (MPC-11) (CL488-65128, Clone: MPC-11) (blue). Cells were fixed and permeabilized with Transcription Factor Staining Buffer Kit (PF00011).
