# Anticorps Monoclonal anti-CD86

Numéro de catalogue:**CL647-65165**

## Informations de base

Numéro de catalogue:	BC040261	Méthode de purification:
CL647-65165	Purification par protéine G	
Taille:	Identification du gène (NCBI):	CloneNo.:
100 tests, 5 µl/test	942	BU63
Hôte:	Nom complet:	Excitation/Emission maxima
Mouse	CD86 molecule	wavelengths:
Isotype:	MW calculé	654 nm / 674 nm
IgG1, kappa	329 aa, 38 kDa	

## Applications

Applications testées:  
FC

Spécificité de l'espèce:  
Humain

## Informations générales

CD86 (also known as B7.2) is a costimulatory molecule belonging to the immunoglobulin superfamily. Primarily expressed on antigen-presenting cells (APCs), including B cells, dendritic cells, and macrophages, CD86 is the ligand for two proteins at the cell surface of T cells, CD28 antigen and cytotoxic T-lymphocyte-associated protein 4. Binding of CD86 with CD28 antigen is a costimulatory signal for activation of the T-cell. Binding of CD86 with cytotoxic T-lymphocyte-associated protein 4 negatively regulates T-cell activation and diminishes the immune response.

## Stockage

Stockage:  
Store at 2-8°C. Avoid exposure to light. Stable for one year after shipment.  
Tampon de stockage:  
PBS avec azoture de sodium à 0,1 % et BSA à 0,5 %, pH 7,3.

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

## Données de validation sélectionnées

100  $\mu$ l human peripheral blood were surface stained with 10  $\mu$ l FITC-Anti-Human CD14 (FITC-65056, Clone: UCHM-1), and 5  $\mu$ l CoraLite® Plus 647-conjugated Anti-Human CD86 (CL647-65165, Clone: BU63) or CoraLite® Plus 647-conjugated Mouse IgG1 isotype control. Cells were then treated with red blood cell lysis buffer and were gated for CD14+ monocytes for analysis of CD86 staining.
