Anticorps Monoclonal anti-CD11c

Numéro de catalogue:**CL647-65196**

Informations de base

Numéro de catalogue:	BC038237	Méthode de purification:
CL647-65196	Purification par protéine G	
Taille:	Identification du gène (NCBI):	CloneNo.:
100 tests, 5 µl/test	3687	BU15
Hôte:	Nom complet:	Excitation/Emission maxima
Mouse	integrin, alpha X (complement component 3 receptor 4 subunit)	wavelengths:
Isotype:	MW calculé	654 nm / 674 nm
IgG1, kappa	1169 aa, 129 kDa	

Applications

Applications testées:

FC

Spécificité de l'espèce:

Humain

Informations générales

Integrins are cell adhesion receptors that are heterodimers composed of non-covalently associated α and β subunits (PMID: 9779984). CD11c, also known as integrin αX, is a type I transmembrane glycoprotein present on a variety of cells, including monocytes/macrophages, granulocytes, a subset of B cells, NK cells and dendritic cells (PMID: 2897326; 1680915; 1694698; 17389580). As a result of its high level of expression on most dendritic cells, CD11c is typically considered to be a marker of conventional dendritic cells (PMID: 27119555). CD11c forms an α/β heterodimer with CD18 (integrin β2). CD11c/CD18 acts a receptor for fibrinogen and is important in monocyte adhesion and chemotaxis (PMID: 1671533).

Stockage

Stockage:

Store at 2-8°C. Avoid exposure to light. Stable for one year after shipment.

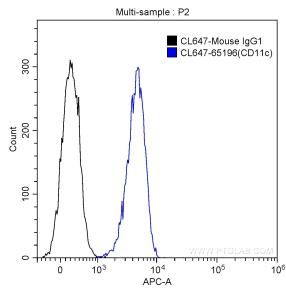

Tampon de stockage:

PBS avec azoture de sodium à 0,1 % et BSA à 0,5 %, pH 7,3.

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Données de validation sélectionnées

1X10⁶ Human peripheral blood granulocytes were surface stained with 5 ul Coralite® Plus 647-conjugated Anti-Human CD11c (CL647-65196, Clone: BU15) (blue), or isotype control antibody (black). Cells were not fixed.
