

À des fins de recherche uniquement

Anticorps Monoclonal anti-ALCAM

Numéro de catalogue: **CL647-65223**

Informations de base

Numéro de catalogue:

CL647-65223

Taille:

100tests , 5 µl/test

Hôte:

Mouse

Isotype:

IgG1, kappa

Numéro d'acquisition GenBank:

BC057809

Identification du gène (NCBI):

214

Nom complet:

activated leukocyte cell adhesion molecule

MW calculé

105 kDa

Méthode de purification:

Purification par affinité

CloneNo.:

3A6

Excitation/Emission maxima wavelengths:

654 nm / 674 nm

Applications

Applications testées:

FC

Spécificité de l'espèce:

Humain

Informations générales

Activated leukocyte cell adhesion molecule (ALCAM, also known as CD166) is a cell adhesion molecule that belongs to the immunoglobulin superfamily. It is involved in cell-cell adhesion through homophilic and heterophilic (to CD6) interactions. ALCAM is widely expressed in a variety of normal tissues and cell types, including activated T cells and monocytes, epithelial cells, fibroblasts, neuronal cells, hepatocytes, and bone marrow mesenchymal stem cells (PMID: 7760007; 25221999). Altered ALCAM expression has been associated with the differentiation state and progression in some neoplasms including melanoma, prostate, colorectal, and breast cancers (PMID: 20461761; 18172759).

Stockage

Stockage:

Store at 2-8°C. Avoid exposure to light. Stable for one year after shipment.

Tampon de stockage:

PBS with 0.09% sodium azide and 0.5% BSA.

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Données de validation sélectionnées

1X10⁶ PHA activated human PBMCs were surface stained with 5 ul CoraLite® Plus 647 Anti-Human ALCAM (CL647-65223, Clone:3A6) or unstained. Cells were not fixed. Monocytes were gated.
