Anticorps Polyclonal de lapin anti-ATF4

Numéro de catalogue: FITC-10835

1 Publications

Informations de base

Numéro de catalogue: FITC-10835	Numéro d'acquisition GenBank: BCO22088	Méthode de purification: Purification par affinité contre l'antigène
Taille: 100ul , Concentration: 1000 µg/ml by Nanodrop;	Identification du gène (NCBI): 468	Dilutions recommandées: IF 1:50-1:500
Hôte: Lapin	Nom complet: activating transcription factor 4 (tax-responsive enhancer element B67)	Excitation/Emission maxima wavelengths: 498 nm / 526 nm
Isotype: IgG	MW calculé: 39 kDa	
Immunogen Catalog Number: AG1279	MW observés: 45-50 kDa	

Applications

Applications testées: FC (Intra), IF	Contrôles positifs: IF : cellules HepG2, cellules HeLa traitées à la tunicamycine
Demandes citées: IF	
Spécificité de l'espèce: Humain, souris	
Espèces citées: Humain	

Informations générales

ATF4 is a transcription factor, that accumulates predominantly in osteoblasts, where it regulates terminal osteoblast differentiation and bone formation[PMID: 19016586]. As a basic leucine-zipper (bZip) transcription factor, ATF4 can regulate amino acid metabolism, cellular redox state, and anti-stress responses. It also regulates age-related and diet-induced obesity and glucose homeostasis in mammals, and has conserved metabolic functions in flies[PMID: 19726872]. Due to its location at chromosome 22q13, a region linked to schizophrenia, ATF4 is considered as a positional candidate gene for schizophrenia[PMID: 18163433]. Otherwise, since ATF4 is induced by tumour microenvironmental factors, and regulates processes relevant to cancer progression, it might serve as a potential therapeutic target in cancer. Endogenous ATF4 protein has a molecular mass of 50kd. [PMID: 17726049]. This antibody is a rabbit polyclonal antibody raised against full length human ATF4 antigen. The antibody recognizes the 38kd ATF4 protein and its phosphorylated forms (50kd). ATF4 can bind DNA as a homodimer and as a heterodimer. ATF4 is ubiquitinated by SCF(BTRC) in response to mTORC1 signal, followed by proteasomal degradation and leading to down-regulate expression of SIRT4, so the molecular weight of ATF4 may be 70 kDa.

Stockage

Stockage:
Stocker à -20 °C. Éviter toute exposition à la lumière. Stable pendant un an après l'expédition.
Tampon de stockage:
PBS avec glycérol à 50 %, Proclin300 à 0,05 % et BSA à 0,5 %, pH 7,3.
L'aliquotage n'est pas nécessaire pour le stockage à -20C

*** Les 20ul contiennent 0,1% de BSA.

E: proteintech@ptglab.com
W: ptglab.com

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Données de validation sélectionnées

1X10⁶ HeLa cells were intracellularly stained with 0.4 ug FITC Anti-Human ATF4 (FITC-10835) (red), or 0.4 ug Control Antibody. Cells were fixed with 4% PFA and permeabilized with Flow Cytometry Perm Buffer (PF00011-C).

Immunofluorescent analysis of (4% PFA) fixed HepG2 cells using FITC ATF4 antibody (FITC-10835) at dilution of 1:200.

Immunofluorescent analysis of (4% PFA) fixed Tunicamycin treated HeLa cells using FITC ATF4 antibody (FITC-10835) at dilution of 1:200, CL594-Phalloidin (red).
