Anticorps Monoclonal anti-CD8

Numéro de catalogue:**FITC-65146**

Informations de base

Numéro de catalogue:	FITC-65146	Numéro d'acquisition GenBank:	BC025715	Méthode de purification:
Taille:	100 tests, 5 µl/test	Identification du gène (NCBI):	925	Purification par affinité
Hôte:	Mouse	Nom complet:	CD8a molecule	CloneNo.:
Isotype:	IgG1, kappa	MW calculé	235 aa, 26 kDa	Excitation/Emission maxima wavelengths:

Applications

Applications testées:
FC

Spécificité de l'espèce:
Humain

Informations générales

CD8 is a transmembrane glycoprotein composed of two disulfide-linked chains. It can be present as a homodimer or CD8α or as a heterodimer of CD8α and CD8β (PMID: 3264320; 8253791). CD8 is found on most thymocytes. The majority of class I-restricted T cells express mostly the CD8αβ heterodimer while CD8αα homodimers alone have been found on some gut intraepithelial T cells, on some T cell receptor (TCR) γδ T cells and on NK cells (PMID: 2111591; 1831127; 8420975). CD8 acts as a co-receptor that binds to MHC class-I and participates in cytotoxic T cell activation (PMID: 8499079). During T cell development, CD8 is required for positive selection of CD4-/CD8+ T cells (PMID: 1968084).

Stockage

Stockage:
Store at 2-8°C. Avoid exposure to light. Stable for one year after shipment.

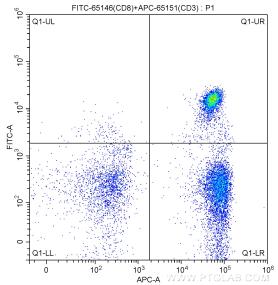

Tampon de stockage:
Tampon à base de phosphate avec azoture de sodium à 0,09 % et gélatine à 0,1 %, pH 7,2.

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Données de validation sélectionnées

1X10⁶ human peripheral blood lymphocytes were surface stained with 5.00 ul/test APC-anti-human CD3 (APC-65151, Clone: UCHT1) and 5.00 ul/test FITC-anti-human CD8 (FITC-65146, Clone: SK1). Cells were not fixed.

1X10⁶ human peripheral blood lymphocytes were surface stained with 5.00 ul/test APC-anti-human CD3 (APC-65151, Clone: UCHT1) and 0.125 ug FITC-mouse IgG1 isotype control. Cells were not fixed.
