Anticorps Monoclonal anti-CD44

Numéro de catalogue: PE-65063 **1 Publications**

Informations de base

Numéro de catalogue: PE-65063	Numéro d'acquisition GenBank: BC004372	Méthode de purification: Purification par affinité
Taille: 100tests , 5 µl/test	Identification du gène (NCBI): 960	CloneNo.: F10-44-2
Hôte: Mouse	Nom complet: CD44 molecule (Indian blood group)	Excitation/Emission maxima wavelengths: 496 nm, 565 nm / 578 nm
Isotype: IgG2a, kappa	MW calculé 742 aa, 82 kDa	

Applications

Applications testées:
FC

Demandes citées:
FC

Spécificité de l'espèce:
Humain

Espèces citées:
Humain

Informations générales

CD44 is a type I transmembrane glycoprotein expressed on embryonic stem cells and in various levels on other cell types including connective tissues and bone marrow. CD44 expression is also upregulated in subpopulations of cancer cells and is recognized as a molecular marker for cancer stem cells (PMID: 29747682). It is a cell-surface receptor that mediates cell-cell and cell-matrix interactions through its affinity for hyaluronic acid (HA) and possibly also through its affinity for other ligands (PMID: 10694938). Adhesion with HA plays an important role in cell migration, tumor growth and progression. CD44 is also involved in lymphocyte activation, recirculation and homing, and in hematopoiesis.

Stockage

Stockage:
Store at 2-8°C. Avoid exposure to light. Stable for one year after shipment.

Tampon de stockage:
PBS with 0.09% sodium azide and 0.5% BSA.

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Données de validation sélectionnées

1X10⁶ human PBMCs were surface stained with 5 ul PE Anti-Human CD44 (PE-65063, Clone:F10-44-2) or Mouse IgG2a Isotype Control. Cells were not fixed. Lymphocytes were gated.
