Anticorps Monoclonal anti-CD45.2

Numéro de catalogue:PE-65072

Informations de base

Numéro de catalogue:	BC028512	Numéro d'acquisition GenBank:	19264	Méthode de purification:
PE-65072				Purification par affinité
Taille:	100ug , 0.2 mg/ml	Identification du gène (NCBI):		CloneNo.:
		19264		104
Hôte:	Mouse	Nom complet:	protein tyrosine phosphatase, receptor type, C	Excitation/Emission maxima wavelengths:
				496 nm, 565 nm / 578 nm
Isotype:	IgG2a, kappa			

Applications

Applications testées:
FC

Spécificité de l'espèce:
souris

Informations générales

CD45, also known as protein tyrosine phosphatase, receptor type C, is a type I transmembrane protein expressed on the surface of all haematopoietic cells with the exception of erythrocytes and platelets (PMID: 3489673; 28615666). CD45 is a pan-haematopoietic cell marker and has been shown to be essential for T- and B-cell activation and signalling (PMID: 9429890; 16378097). Allelic variants of mouse CD45, CD45.1 (Ly5.1) and CD45.2 (Ly5.1), have been established as a marker system to track haematopoietic cells following congenic mouse bone marrow transplants (PMID: 28615666). CD45.2 is the common form and is expressed by most of the established strains, while CD45.1 is found in only a few like the SJL mouse strain (PMID: 3489673).

Stockage

Stockage:
Store at 2-8°C. Avoid exposure to light. Stable for one year after shipment.
Tampon de stockage:
Tampon à base de phosphate avec azoture de sodium à 0,09 % et gélatine à 0,1 %, pH 7,2.

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Données de validation sélectionnées

1X10⁶ C57BL/6 mouse splenocytes were surface stained with 0.50 ug PE-Anti-Mouse CD45.2 (PE-65072, clone: 104) (red) or 0.50 ug PE-mouse IgG2a isotype control (blue). Cells were not fixed.
