Anticorps Monoclonal anti-CD69

Numéro de catalogue:PE-65105

Informations de base

Numéro de catalogue:	BC106997	Méthode de purification:
PE-65105	Purification par affinité	
Taille:	Identification du gène (NCBI):	CloneNo.:
100ug , 0.2 mg/ml	12515	H1.2F3
Hôte:	Nom complet:	Excitation/Emission maxima
Armenian Hamster	CD69 antigen	wavelengths:
Isotype:		496 nm, 565 nm / 578 nm
IgG		

Applications

Applications testées:
FC

Spécificité de l'espèce:
souris

Informations générales

CD69, also known as AIM, EA-1, Leu-23, and MLR3, is a type II transmembrane glycoprotein that belongs to the C-type lectin superfamily (PMID: 8340758; 7804122). CD69 is constitutively expressed by mature thymocytes, platelets, several subsets of tissue resident immune cells (including resident memory T cells and gamma delta T cells), and is inducibly expressed by activated T cells, B cells, natural killer (NK) cells, monocytes, neutrophils (PMID: 8100776; 28475283). CD69 has been identified as an early activation marker of lymphocytes and is commonly used as a marker of activated lymphocytes and NK cells (PMID: 28475283; 25759842). It is involved in the regulation of immune responses (PMID: 15745855).

Stockage

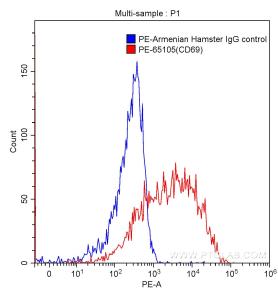

Stockage:
Stocker à une température comprise entre 2 °C et 8 °C. Éviter toute exposition à la lumière.
Tampon de stockage:
Tampon à base de phosphate avec azoture de sodium à 0,09 % et gélatine à 0,1 %, pH 7,2.

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Données de validation sélectionnées

1×10^6 PMA and Ionomycin stimulated C57BL/6 mouse splenocytes (6 hrs) were surface stained with 0.20 ug PE-Anti-Mouse CD69 (PE-65105, clone H1.2F3) (red) or 0.20 ug PE-Armenian Hamster IgG isotype control (blue). Cells were not fixed.
