Anticorps Monoclonal anti-CD154

Numéro de catalogue: PE-65156

Informations de base

Numéro de catalogue:	PE-65156	Numéro d'acquisition GenBank:	BC071754	Méthode de purification:
Taille:	100 tests, 10 µl/test	Identification du gène (NCBI):	959	L'anticorps purifié est conjugué à la R-phycoérythrine (PE) dans des conditions optimales. Le conjugué est purifié par chromatographie d'exclusion de taille.
Hôte:	Mouse	Nom complet:	CD40 ligand	CloneNo.:
Isotype:	Mouse IgG1	MW calculé	261 aa, 29 kDa	24-31
				Excitation/Emission maxima wavelengths:
				496 nm, 565 nm / 578 nm

Applications

Applications testées:

FC

Spécificité de l'espèce:

Humain, primates non humains

Informations générales

The CD40 ligand (CD40L, TRAP, CD154), a member of the TNF superfamily of ligands, is expressed as either a 33-kd transmembrane homologue or 18-kd soluble form (sCD154). CD40L is primarily expressed on activated CD4+ T cells and on a small proportion of CD8+ T cells and platelets. It binds to CD40 on antigen-presenting cells (APC), which leads to many effects depending on the target cell type. It has been suggested that CD40/CD40L interactions regulate oxidative stress and affect various signaling pathways in both the immunological and the cardiovascular systems. The CD40/CD40L system is also involved in tumorigenesis. Its expression is tightly regulated, and abnormal levels of CD40L are associated with the pathogenesis of atherosomatous plaque destabilization and thrombotic events. Multiple mutations in CD40LG gene have been identified that are associated with hyper-IgM immunodeficiency syndrome type 1.

Stockage

Stockage:

Stocker à une température comprise entre 2 °C et 8 °C. Éviter toute exposition à la lumière.

Tampon de stockage:

PBS avec azoture de sodium à 0,1 %.

W: ptglab.com

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Données de validation sélectionnées

1X10⁶ PMA (50 ng/ml) and ionomycin (1 ug/ml)-stimulated human PBMCs (5 hours) were surface stained with 10 ul PE Anti-Human CD154 (PE-65156, Clone: 24-31) (red) or isotype control antibody (black). Cells were not fixed.
