Anticorps Monoclonal anti-CD279

Numéro de catalogue: PE-65168

Informations de base

Numéro de catalogue:	BC074740	Méthode de purification:
PE-65168	L'anticorps purifié est conjugué à la R-phycoérythrine (PE) dans des conditions optimales. Le conjugué est purifié par chromatographie d'exclusion de taille.	
Taille:	5133	CloneNo.:
100 tests, 10 µl/test	Nom complet: programmed cell death 1	EH12.2H7
Hôte:	MW calculé	Excitation/Emission maxima wavelengths:
Mouse	288 aa, 32 kDa	496 nm, 565 nm / 578 nm
Isotype:		
Mouse IgG1 kappa		

Applications

Applications testées:

FC

Spécificité de l'espèce:

Humain, primates non humains

Informations générales

Programmed cell death 1 (PD-1, also known as CD279) is an immunoinhibitory receptor that belongs to the CD28/CTLA-4 subfamily of the Ig superfamily. It is a 288 amino acid (aa) type I transmembrane protein composed of one Ig superfamily domain, a stalk, a transmembrane domain, and an intracellular domain containing an immunoreceptor tyrosine-based inhibitory motif (ITIM) as well as an immunoreceptor tyrosine-based switch motif (ITSM) (PMID: 18173375). PD-1 is expressed during thymic development and is induced in a variety of hematopoietic cells in the periphery by antigen receptor signaling and cytokines (PMID: 20636820). Engagement of PD-1 by its ligands PD-L1 or PD-L2 transduces a signal that inhibits T-cell proliferation, cytokine production, and cytolytic function (PMID: 19426218). It is critical for the regulation of T cell function during immunity and tolerance. Blockade of PD-1 can overcome immune resistance and also has been shown to have antitumor activity (PMID: 22658127; 23169436).

Stockage

Stockage:

Stocker à une température comprise entre 2 °C et 8 °C. Éviter toute exposition à la lumière.

Tampon de stockage:

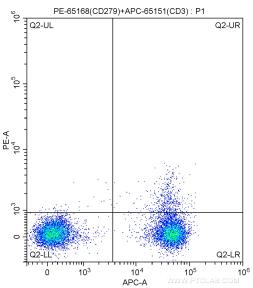

PBS avec azoture de sodium à 0,1 %.

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Données de validation sélectionnées

1X10⁶ human peripheral blood mononuclear cells (PBMCs) were surface stained with APC Anti-Human CD3 (APC-65151, clone UCHT1) and 10.00 ul/test PE Anti-Human CD279 (PE-65168, Clone:EH12.2H7). Cells were not fixed.

1X10⁶ human peripheral blood mononuclear cells (PBMCs) were surface stained with APC Anti-Human CD3 (APC-65151, clone UCHT1) and PE mouse IgG1 isotype control antibody. Cells were not fixed.
