For Research Use Only

Prothymosin Alpha Polyclonal antibody

Catalog Number: 10480-1-AP

Basic Information

Catalog Number:

10480-1-AP

Size:

150ul , Concentration: 800 $\mu g/ml$ by Nanodrop and 400 µg/ml by Bradford Full Name:

method using BSA as the standard;

Rabbit Isotype: IgG

Immunogen Catalog Number:

AG0732

GenBank Accession Number:

BC003510

GeneID (NCBI):

prothymosin, alpha Calculated MW:

12 kDa

Purification Method: Antigen affinity purification Recommended Dilutions:

IHC 1:20-1:200

Positive Controls:

IHC: human lymphoma tissue,

Applications

Tested Applications:

IHC,ELISA

Species Specificity:

Note-IHC: suggested antigen retrieval with TE buffer pH 9.0; (*) Alternatively, antigen retrieval may be performed with citrate buffer pH 6.0

Background Information

Prothymosin alpha (PTMA) is a nuclear protein possessing a number of cellular functions including cell survival. PTMA is identified to be localized in the nuclei of neurons, while it is found in both nuclei and cytoplasm in the astrocytes and microglia of adult brai. PTMA inhibits the neuronal necrosis induced by serum-free starvation or ischemia-reperfusion stress, which causes a rapid internalization of GLUT1/4, leading a decrease in glucose uptake and cellular ATP levels. Extensive research on PTMA showed that it is of clinical significance and potential medical use as they may serve as a molecular marker for cancer prognosis and/or as therapeutic agents for treating $immunode ficiencies, autoimmune\ diseases\ and\ malignancies.$

Storage

Storage:

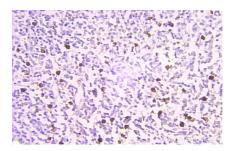

Store at -20°C. Stable for one year after shipment.

PBS with 0.02% sodium azide and 50% glycerol pH 7.3.

Aliquoting is unnecessary for -20°C storage

*** 20ul sizes contain 0.1% BSA

Selected Validation Data

Immunohistochemical analysis of paraffinembedded human lymphoma using 10480-1-AP (Prothymosin alpha antibody) at dilution of 1:100 (under 25x lens).
