For Research Use Only

AGO2 Polyclonal antibody

Catalog Number:10686-1-AP

Featured Product

65 Publications

Basic Information	Catalog Number: 10686-1-AP	GenBank Accession Number: BC007633	Purification Method: Antigen affinity purification	
	Size:	GenelD (NCBI):	Recommended Dilutions:	
	150ul , Concentration: 160 µg/ml by Bradford method using BSA as the standard;	27161	WB 1:200-1:1000	
		UNIPROT ID: Q9UKV8		
	Source:	Full Name:		
	Rabbit	eukaryotic translation initiation factor 2C, 2		
	Isotype:			
	IgG	Calculated MW:		
	Immunogen Catalog Number: AG1032	97 kDa		
	A01032	Observed MW: 94-97 kDa		
Applications	Tested Applications:	Positive Controls:		
	WB, ELISA	WB : HEK-293 cells, K-562 cells		
	Cited Applications: WB, IP, RIP, CLIP			
	Species Specificity: human, mouse, rat			
	Cited Species: human, mouse, fish			
	hanan, mouse, nsh			
Background Information	EIF2C2, also named as AGO2, belong gene silencing (RNAi) by the RNA-inc EIF2C2/AGO2 bound to a short guide inhibit translation initiation by bind translation initiation factor eIF4-E. In to the 60S ribosomal subunit and pre	Juced silencing complex (RISC). T RNA such as a microRNA (miRNA) ing to the 7-methylguanosine cap, also inhibit translation initiation vents its association with the 40S mRNAs under certain growth cond	he 'minimal RISC' appears to include) or short interfering RNA (siRNA). EIF2C2 ma , thereby preventing the recruitment of the via interaction with EIF6, which itself binds ribosomal subunit. EIF2C2 can also ditions. This antibody is specific to EIF2C2.	
	EIF2C2, also named as AGO2, belong gene silencing (RNAi) by the RNA-inc EIF2C2/AGO2 bound to a short guide inhibit translation initiation by bind translation initiation factor eIF4-E. In to the 60S ribosomal subunit and pre upregulate the translation of specific EIF2C2 exists two isoforms and mole	Juced silencing complex (RISC). This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

HEK-293 cells were subjected to SDS PAGE followed by western blot with 10686-1-AP (AGO2 antibody) at dilution of 1:300 incubated at room temperature for 1.5 hours. K-562 cells were subjected to SDS PAGE followed by western blot with 10686-1-AP (AGO 2 antibody) at dilution of 1:300 incubated at room temperature for 1.5 hours.
