Rabbit

GABA(A) receptor-associated protein-

Isotype:

like 2

Immunogen Catalog Number:

Calculated MW: 14 kDa

AG1155

Tested Applications:

FIISA

Cited Applications:

WB

Species Specificity: human, mouse, rat **Cited Species:**

human

Background Information

GABARAPL2 (also known as Golgi-associated ATPase enhancer of 16 kDa; GATE-16) was originally characterized as a factor essential for intra-Golgi protein transport. Later GABARAPL2 along with LC3 and GABARAP, were identified as the homologs of yeast ATG8 which is a unique ubiquitin-like protein essential for autophagy. When induced GABARAPL2 is first digested by ATG4 family enzymes to become its mature form: GABARAPL2-I, later conjugated to PE lipid as lipidated form: GABARAPL2-II. The lipidated form migrates faster than its mature form on SDS-PAGE gel. GABARAPL2 is strongly expressed in the brain. This antibody, generated against the full-length of GABARAPL2, is specific to GABARAPL2. It does not recognize recombinant GABARAP as well as GABARAPL1.

Storage

Storage:

Store at -20°C. Stable for one year after shipment.

PBS with 0.02% sodium azide and 50% glycerol pH 7.3.

Aliquoting is unnecessary for -20°C storage

*** 20ul sizes contain 0.1% BSA

in USA), or 1(312) 455-8498 (outside USA)
