Background Information

SERPINA6, also known as corticosteroid-binding globulin or CBG, belongs to the serpin family of serine protease inhibitors, and is mainly secreted by the liver. It is an alpha-globulin protein with corticosteroid-binding properties, and involved in obesity and stress sensitivity. It is also the major transport protein for glucocorticoids and progestins in the blood of most vertebrates. Defects in SERPINA6 are a cause of corticosteroid-binding globulin deficiency (CBG deficiency).
