## PEPD Polyclonal antibody

Catalog Number:12218-1-AP

Featured Product

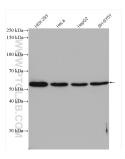

Basic Information	Catalog Number: 12218-1-AP	GenBank Accession Numbe BC015027	r: Purification Method: Antigen affinity purification
	Size:	GeneID (NCBI):	Recommended Dilutions:
	150ul, Concentration: 500 ug/ml by	5184	WB 1:500-1:3000
	Nanodrop and 267 ug/ml by Bradford method using BSA as the standard;	UNIPROT ID: P12955	IHC 1:100-1:800 IF/ICC 1:50-1:500
	Source:	Full Name:	
	Rabbit	peptidase D	
	Isotype:	Calculated MW:	
	IgG	493 aa, 55 kDa	
	Immunogen Catalog Number: AG2842	Observed MW: 55 kDa	
Applications	Tested Applications:	Positive Controls:	
	and the second se		HEK-293 cells, MDA-MB-453s cells, mouse skin
	WB, IHC		Je, HeLa cells, HepG2 cells, SH-SY5Y cells
	Species Specificity:		: human lung cancer tissue,
	human, mouse	1671	CC : HepG2 cells,
	Cited Species: human		
	Note-IHC: suggested antigen retrieval with		
	TE buffer pH 9.0; (*) Alternativ retrieval may be performed w buffer pH 6.0	vely, antigen	
	PEPD, also named as PRD, Prolidase, X-Pro dipeptidase, Imidodipeptidase, Peptidase D and Proline dipeptidase, belongs to the peptidase M24B family and Eukaryotic-type prolidase subfamily. PEPD splits dipeptides with a proly or hydroxyprolyl residue in the C-terminal position. It plays an important role in collagen metabolism because the high level of iminoacids in collagen. Defects in PEPD are a cause of prolidase deficiency (PD). PEPD is considered as the most promising candidate genes for altering AAA risk, based on gene function, association evidence, gene expression, and protein expression.(PMID:21247474)		
Background Information	belongs to the peptidase M24B family or hydroxyprolyl residue in the C-terr high level of iminoacids in collagen. the most promising candidate genes	y and Eukaryotic-type prolid ninal position. It plays an im Defects in PEPD are a cause for altering AAA risk, based o	ase subfamily. PEPD splits dipeptides with a prol portant role in collagen metabolism because the of prolidase deficiency (PD). PEPD is considered a

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

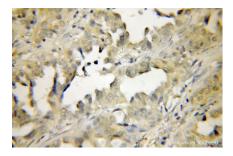

## Selected Validation Data

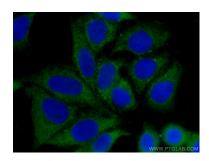

Various lysates were subjected to SDS PAGE followed by western blot with 12218-1-AP (PEPD antibody) at dilution of 1:1000 incubated at room temperature for 1.5 hours.

WB result of PEPD antibody (12218-1-AP; 1:1000; incubated at room temperature for 1.5 hours) with sh-Control and sh-PEPD transfected HEK-293 cells.

Immunohistochemical analysis of paraffinembedded human lung cancer using 12218-1-AP (PEPD antibody) at dilution of 1:50 (under 10x lens).

Immunofluorescent analysis of (-20°C Ethanol) fixed HepG2 cells using 12218-1-AP (PEPD antibody) at dilution of 1:100 and Coralite488-Conjugated Goat Anti-Rabbit IgG(H+L).
