

For Research Use Only

XPOT Polyclonal antibody, PBS Only

Catalog Number:12577-1-PBS

Basic Information

Catalog Number: 12577-1-PBS	GenBank Accession Number: BC020569	Purification Method: Antigen affinity purification
Size: 100ug , Concentration: 1 mg/ml by Nanodrop;	GeneID (NCBI): 11260	
Source: Rabbit	UNIPROT ID: O43592	
Isotype: IgG	Full Name: exportin, tRNA (nuclear export receptor for tRNAs)	
Immunogen Catalog Number: AG3256	Calculated MW: 962 aa, 110 kDa	
	Observed MW: 100-110 kDa	

Applications

Tested Applications:
WB, Indirect ELISA

Species Specificity:
human

Background Information

XPOT (also known as Exportin-T) is a key member of the karyopherin- β family of nuclear transport receptors, specifically responsible for the export of a critical class of small non-coding RNAs, transfer RNAs (tRNAs), from the nucleus to the cytoplasm. This process is essential for protein synthesis, as tRNAs must function in the cytoplasm to decode mRNA sequences and deliver amino acids to the growing polypeptide chain. XPOT recognizes mature tRNAs that have been properly processed and aminoacylated in the nucleus, loading them in a RanGTP-dependent manner. Upon translocation through the nuclear pore complex, the hydrolysis of RanGTP to RanGDP in the cytoplasm triggers the release of the tRNA cargo, thereby ensuring that only functional tRNAs are utilized for translation and maintaining the spatial separation of nuclear and cytoplasmic processes.

Storage

Storage:
Store at -80°C.

Storage Buffer:
PBS only, pH7.3

W: ptglab.com

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 12577-1-AP (XPOT antibody) at dilution of 1:2000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 12577-1-PBS in a different storage buffer formulation.
