Background Information

Inositol polyphosphate 4 phosphatase (INPP4A) belongs to the group of phosphoinositide phosphatases controlling proliferation, apoptosis, and endosome function by hydrolyzing phosphatidylinositol 3,4-bisphosphate. INPP4A is highly expressed in the central nervous system, which is shown to play a key role in glutamate excitotoxicity and cell proliferation. (PMID: 36653678, PMID: 31938306)
