GCNF Polyclonal antibody Catalog Number:12712-1-AP Featured Product

4 Publications

| Basic Information | Catalog Number: 12712-1-AP | GenBank Accession Number: BC030600 | Purification Method: Antigen affinity purification | |
|---------------------------------|--|--|--|--|
| | Size: | GenelD (NCBI): | Recommended Dilutions: WB 1:500-1:2000 IP 0.5-4.0 ug for 1.0-3.0 mg of total protein lysate IHC 1:20-1:200 | |
| | 150ul , Concentration: 147 ug/ml by Nanodrop and 147 ug/ml by Bradford method using BSA as the standard; | 2649 | | |
| | | Q15406 | | |
| | Source: Rabbit | Full Name: nuclear receptor subfamily 6, group A | | |
| | lsotype: IgG | member 1 Calculated MW: 475 aa, 54 kDa | | |
| | Immunogen Catalog Number: AG3395 | | | |
| | | Observed MW: | | |
| | | 54 kDa | | |
| Applications | Tested Applications: | Positive Controls: WB : PC-3 cells, K-562 cells, mouse testis tissue | | |
| | WB, IP, IHC, ELISA | | | |
| | Cited Applications: IP : mouse t WB, IHC, IF | | tis tissue, | |
| | Species Specificity: human, mouse, rat | IHC : human t | IHC : human testis tissue, | |
| | Cited Species: human, mouse | | | |
| | Note-IHC: suggested antigen r TE buffer pH 9.0; (*) Alternativ retrieval may be performed w buffer pH 6.0 | vely, antigen | | |
| Background Information | NR6A1 (Nuclear Receptor Subfamily 6 Group A member), also known as GCNF (Germ Cell Nuclear Factor), is an orphan member of the nuclear receptor gene superfamily. It has been shown to be expressed in the nervous system during development and during specific stages in maturing germ cells of the ovary and testis in the adult, and has probable roles in gametogenesis, neurogenesis, and normal embryonic development during gastrulation. Inactivation of GCNF in mouse results in abnormal posterior development, impaired midbrain development, insufficient closure of the neural tube, and eventual embryonic death. GCNF has been shown to be a repressor of OCT-4 and plays a critical role in the control of gene expression during embryogenesis and spermatogenesis. This antibody specifically reacts with the 55kd NR6A1 protein. | | | |

Selected Validation Data

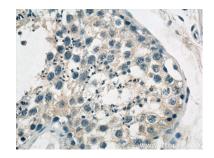

PC-3 cells were subjected to SDS PAGE followed by western blot with 12712-1-AP (GCNF antibody) at dilution of 1:300 incubated at room temperature for 1.5 hours.

IP result of anti-GCNF (IP:12712-1-AP, 4ug; Detection:12712-1-AP 1:800) with mouse testis tissue lysate 4000ug.

-55 kDa

Normal Rabbit IgG GCNF Antibody

Immunohistochemical analysis of paraffinembedded human testis tissue slide using 12712-1-AP (GCNF antibody at dilution of 1:50 (under 40x lens).
