ATXN3, ATXN3 Polyclonal antibody

**Catalog Number:** 13505-1-AP  
**Featured Product**  
**18 Publications**

### Basic Information
- **Catalog Number:** 13505-1-AP
- **Size:** 150μl, Concentration: 500 μg/ml by Nanodrop
- **Source:** Rabbit
- **Isotype:** IgG
- **Immunogen Catalog Number:** AG4341
- **GenBank Accession Number:** BC033711
- **GeneID (NCBI):** 4287
- **Full Name:** ataxin 3
- **Calculated MW:** 370 aa, 43 kDa
- **Observed MW:** 35-42 kDa
- **Purification Method:** Antigen affinity purification
- **Recommended Dilutions:** WB 1:1000-1:4000, IHC 1:20-1:200

### Applications
- **Tested Applications:** IHC, IP, WB, ELISA
- **Cited Applications:** CoIP, IF, IHC, IP, WB
- **Species Specificity:** human, mouse, rat
- **Cited Species:** human, mouse, pig, Caenorhabditis elegans

**Note-IHC:** suggested antigen retrieval with TE buffer pH 9.0; (*) Alternatively, antigen retrieval may be performed with citrate buffer pH 6.0

### Background Information
ATXN3, which has deubiquitinase activity and act as a component of the ubiquitin proteasome system, plays a role in transcriptional regulation and neuroprotection. ATXN3 interacts with RAD23, HHR23A and HHR23B, involves in the pathology of MJD. ATXN3 is a mixed-linkage, chain-editing enzyme and that the UIM region of ATXN3 regulates its substrate specificity. Contains an N-terminal deubiquitinating domain, called the Josephin domain, followed by 2 ubiquitin-interacting motifs (UIMs) and a polyQ tract near the C terminus. ATXN3 can be phosphorylated in a protein casein kinase-2-dependent manner, thus the MW would be larger than the predicted one.

### Storage
- **Storage:** Store at -20°C. Stable for one year after shipment.
- **Storage Buffer:** PBS with 0.02% sodium azide and 50% glycerol pH 7.3.
- **Aliquoting is unnecessary for -20°C storage**

*** 20ul sizes contain 0.1% BSA

Various lysates were subjected to SDS PAGE followed by western blot with 13505-1-AP (ATX3,ATXN3 antibody) at dilution of 1:2000 incubated at room temperature for 1.5 hours. HEK-293 (WT and ATXN3 KO) lysates prepared with RIPA buffer, 30 μg protein loaded. 13505-1-AP incubated at 1:1000 at 4°C overnight in 5% BSA in TBST. Ponceau stained transfers shown on right. Data provided by YCharOS, an open science company with a mission to validate commercial antibodies to improve scientific reproducibility and transparency.

Immunohistochemical analysis of paraffin-embedded human pancreas cancer using 13505-1-AP (ATX3,ATXN3 antibody) at dilution of 1:100 (under 10x lens). HEK-293 lysates prepared and IP of ATXN3 performed using 1.0 μg of 13505-1-AP coupled to protein A-Sepharose beads. The Ponceau stained transfers of each blot are shown. Data provided by YCharOS, an open science company with a mission to validate commercial antibodies to improve scientific reproducibility and transparency.
