For Research Use Only

## LAMR1/RPSA Polyclonal antibody

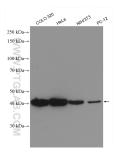

Catalog Number:14533-1-AP

Featured Product 14 Publications

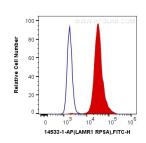

Antibodies | ELISA kits | Proteins www.ptglab.com

Basic Information	Catalog Number: 14533-1-AP	GenBank Accession Nu BC050688	ımber:	Purification Method: Antigen affinity purifica	ation
	Size:	GeneID (NCBI): 3921		Recommended Dilutions: WB 1:1000-1:4000 IHC 1:200-1:800	
	150ul , Concentration: 300 ug/ml by Nanodrop and 200 ug/ml by Bradford				
	method using BSA as the standard;	UNIPROT ID: P08865		IF/ICC 1:200-1:800	
	Source: Rabbit	Full Name: ribosomal protein SA			
	Isotype: IgG	Calculated MW: 33 kDa			
	Immunogen Catalog Number: AG6033	Observed MW: 40 kDa			
Applications	Tested Applications:		Positive Controls:		
	Cited Applications: tissue			DLO 320 cells, mouse liver tissue, mouse colo HeLa cells, NIH/3T3 cells, PC-12 cells	
	WB, IHC, IF		IHC : human stomach tissue, mouse brain tissue		
	Species Specificity: IF/ICC : human, mouse, rat			HepG2 cells,	
	Cited Species: human, mouse, pig				
	Note-IHC: suggested antigen retrieval with TE buffer pH 9.0; (*) Alternatively, antigen retrieval may be performed with citrate buffer pH 6.0				
Background Information	The ribosomal protein SA (RPSA), pre (37LRP) and p40 ribosome-associated pathological processes, such as cance the level of the laminin receptor tran normal counterparts. This antibody is This antibody is specific to RPSA (LAN precursor (37LRP)], most probably by where it is involved in translational p at the cell surface and it not only serv the cellular prion protein.	I protein, is a multifunct er and prion diseases. It script is higher in colon a rabbit polyclonal ant /IR1).67LR derives from fatty acid acylation. 37 processes and maintena	tional protein, is overexpress carcinoma tiss ibody raised a homo- or heter _RP is mostly funce of nuclear	that plays a role in a num ed in various cancer cell l sue and lung cancer cell li gainst full length RPSA of ro- dimerization of a 37 kI ound in the cytosol and nu structures, respectively. 6	ber of ines, and the ne than their human origin. Da cytosolic Icleus [10] 57LR is localize

## Selected Validation Data

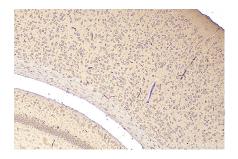

Various lysates were subjected to SDS PAGE followed by western blot with 14533-1-AP (LAMR1/RPSA antibody) at dilution of 1:2000 incubated at room temperature for 1.5 hours.

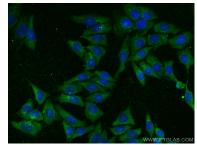

1X10^6 HeLa cells were intracellularly stained with 0.2 ug Anti-Human LAMR1/RPSA (14533-1-AP) and CoraLite®488-Conjugated AffiniPure Goat Anti-Rabbit IgG(H+L) at dilution 1:1000 (red), or 0.2 ug Control Antibody. Cells were fixed with 4% PFA and permeabilized with Flow Cytometry Perm Buffer (PF00011-C).

Immunohistochemical analysis of paraffinembedded human stomach tissue slide using 14533-1-AP (LAMR1/RPSA antibody) at dilution of 1:400 (under 20x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).

Immunohistochemical analysis of paraffinembedded mouse brain tissue slide using 14533-1-AP (LAMR1/RPSA antibody) at dilution of 1:400 (under 10x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).

Immunofluorescent analysis of (-20°C Ethanol) fixed HepG2 cells using LAMR1/RPSA antibody (14533-1-AP) at dilution of 1:400 and CoraLite®488-Conjugated AffiniPure Goat Anti-Rabbit IgG(H+L).
