PSMB7 Polyclonal antibody

Catalog Number:14727-1-AP 3 Publications

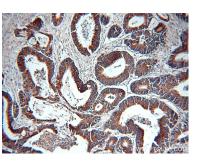

Basic Information	Catalog Number: 14727-1-AP	GenBank Accession Number: BC000509	Purification Method: Antigen affinity purification	
	Size:	GenelD (NCBI):	Recommended Dilutions:	
	150ul , Concentration: 133 µg/ml by Bradford method using BSA as the standard;	5695	WB 1:200-1:1000	
		UNIPROT ID: Q99436	IHC 1:20-1:200	
	Source:	Full Name:		
	Rabbit Isotype: IgG Immunogen Catalog Number: AG6486	proteasome (prosome, macropain) subunit, beta type, 7		
				Calculated MW: 29.9 kDa
		Observed MW:		
		25-27 kDa		
		Applications	Tested Applications:	Positive Controls:
WB, IHC, ELISA	WB : Raji cells, A549 cells IHC : human colon cancer tissue, human breast cancer tissue, human colon tissue			
Cited Applications: WB				
Species Specificity: human, mouse, rat				
Cited Species: rat, mouse				
Note-IHC: suggested antigen r TE buffer pH 9.0; (*) Alternati retrieval may be performed w buffer pH 6.0	vely, antigen			
	The proteasome is a multicatalytic proteinase complex with a highly ordered ring-shaped 20S core structure. PSMB: protein is a member of the proteasome B-type family, also known as the T1B family, and is a 20S core beta subunit in the proteasome. Expression of this catalytic subunit is downregulated by gamma interferon, and proteolytic processing is required to generate a mature subunit. Component of the 20S core proteasome complex are involved in the proteolytic degradation of most intracellular proteins. PSMB7 displays a trypsin-like activity.(PMID:15244466 PMID:27176742, PMID: 8610016)			
Background Information	protein is a member of the proteason in the proteasome. Expression of this processing is required to generate a in the proteolytic degradation of mos	ne B-type family, also known as the catalytic subunit is downregulated mature subunit. Component of the 20	T1B family, and is a 20S core beta subuni by gamma interferon, and proteolytic vS core proteasome complex are involved	
	protein is a member of the proteason in the proteasome. Expression of this processing is required to generate a in the proteolytic degradation of mos PMID:27176742, PMID: 8610016)	ne B-type family, also known as the catalytic subunit is downregulated mature subunit. Component of the 20 st intracellular proteins. PSMB7 displ	T1B family, and is a 20S core beta subuni by gamma interferon, and proteolytic IS core proteasome complex are involved ays a trypsin-like activity.(PMID:1524440	
	protein is a member of the proteasom in the proteasome. Expression of this processing is required to generate a t in the proteolytic degradation of mos PMID:27176742, PMID: 8610016) Author Put	ne B-type family, also known as the catalytic subunit is downregulated mature subunit. Component of the 20 st intracellular proteins. PSMB7 displ	T1B family, and is a 20S core beta subuni by gamma interferon, and proteolytic IS core proteasome complex are involved ays a trypsin-like activity.(PMID:1524440 Application

Selected Validation Data

y Immunohistochemical analysis of paraffinat embedded human colon cancer using 14727-1-AP for (PSMB7 antibody) at dilution of 1:50 (under 10x lens).

Immunohistochemical analysis of paraffinembedded human colon cancer using 14727-1-AP (PSMB7 antibody) at dilution of 1:50 (under 40x lens).

Raji cells were subjected to SDS PAGE followed by western blot with 14727-1-AP (PSMB7 antibody) at dilution of 1:200 incubated at room temperature for 1.5 hours.
