## GEFT-Specific Polyclonal antibody

Catalog Number:14839-1-AP 14 Publications

| Basic Information                              | Catalog Number:<br>14839-1-AP  | GenBank Accession<br>NM_182947   | n Number:  | Purification Method:<br>Antigen affinity purification   |
|--|--|--|--|---|
|  | Size:  | GeneID (NCBI):   |  | Antigen anning purneation   |
|  | 150ul , Concentration: 750 µg/ml by  | 115557   |  |   |
|  | Nanodrop and 500 $\mu$ g/ml by Bradford  | UNIPROT ID:  |  |   |
|  | method using BSA as the standard;  | Q86VW2   |  |   |
|  | Source:<br>Rabbit  | Full Name:<br>RhoA/RAC/CDC42   | exchange factor  |   |
|  | Isotype:   | Calculated MW:   |  |   |
|  | IgG  | 64 kDa   |  |   |
|  |  | Observed MW:<br>64 kDa   |  |   |
| Applications                                   | Tested Applications:   |  |  |   |
| , pp   | ELISA  |  |  |   |
|  | Cited Applications:<br>WB, IHC, IF   |  |  |   |
|  | Species Specificity:   |  |  |   |
|  | human, mouse, rat  |  |  |   |
|  | Cited Species:   |  |  |   |
|  | human, mouse, rat  |  |  |   |
|  | human, mouse, rat  |  |  |   |
| Background Information                         | GEFT, also named as p63RhoGEF, ma<br>activation induces formation of actin<br>of small GTPases. GETF links specific<br>important regulator of processes invo   | stress fibers. It work<br>ally G alpha q/11-co<br>lved in axon and de  | cs as a guanine nu<br>oupled receptors to<br>endrite formation.  | ,   |
|  | GEFT, also named as p63RhoGEF, ma<br>activation induces formation of actin<br>of small GTPases. GETF links specific<br>important regulator of processes invo<br>factor primarily for RAC1. It is involve<br>kDa).  | stress fibers. It work<br>ally G alpha q/11-cc<br>lved in axon and de<br>ed in skeletal myog   | xs as a guanine nu<br>oupled receptors t<br>endrite formation.<br>enesis. GEFT is ex   | cleotide exchange factor for Rho famil<br>o RHOA activation. GEFT may be an<br>In neurons seems to be an exchange<br>pressed as three isoforms (64, 53 and 6                                      |
