Background Information

PCBD1, also known as DCOH and PCBD, belongs to the pterin-4-alpha-carbinolamine dehydratase family. PCBD1 is a bifunctional protein that acts as an enzyme in the regeneration of cofactor tetrahydrobiopterin (BH4), crucial for the function of aromatic amino acid hydroxylases, and as a dimerization cofactor of transcription factors HNF1A and HNF1B, important in liver and pancreas development and function. PCBD1 is expressed in the developing pancreas. The calculated molecular weight of PCBD1 is 12 kDa (PMID: 24204001, 24848070).
