Background Information

Adaptor protein (AP) complex is a component of intracellular protein transport. The AP4 complex is involved in sorting transmembrane cargo proteins into transport vesicles for trans-Golgi network export. AP4B1 is a member of the AP4 complex, which also includes AP4E1, AP4M1 and AP4S1. Loss-of-function variants in any of these four members can lead to AP-4-associated hereditary spastic paraplegia (HSP), a neurodegenerative disorder (PMID: 30543385). This antibody recognizes AP4B1.
