For Research Use Only

AP4B1 Polyclonal antibody, PBS Only

Catalog Number: 16313-1-PBS

Basic Information

Catalog Number:

GenBank Accession Number:

Purification Method:

Antigen affinity purification

16313-1-PBS

BC014146 GeneID (NCBI):

100ug, Concentration: 1 mg/ml by 10717

Nanodrop:

UNIPROT ID:

Rabbit

Q9Y6B7 Full Name:

Isotype:

adaptor-related protein complex 4,

IgG

beta 1 subunit

Immunogen Catalog Number: AG9348

Calculated MW: 739 aa, 83 kDa

Observed MW:

75-83 kDa

Applications

Tested Applications:

WB, IP, Indirect ELISA

Species Specificity:

Background Information

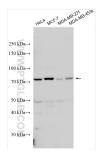

Adaptor protein (AP) complex is a component of intracellular protein transport. The AP4 complex is involved in sorting transmembrane cargo proteins into transport vesicles for trans-Golgi network export. AP4B1 is a member of the AP4 complex, which also includes AP4E1, AP4M1 and AP4S1. Loss-of-function variants in any of these four members can lead to AP-4-associated hereditary spastic paraplegia (HSP), a neurodegenerative disorder (PMID: 30543385). This antibody recognizes AP4B1.

Storage

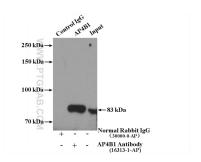

Storage: Store at -80°C.

Storage Buffer: PBS Only

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 16313-1-AP (AP4B1 antibody) at dilution of 1:500 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 16313-1-PBS in a different storage buffer formulation.

IP result of anti-AP4B1 (IP:16313-1-AP, 4ug; Detection:16313-1-AP 1:300) with HeLa cells lysate 3200ug. This data was developed using the same antibody clone with 16313-1-PBS in a different storage buffer formulation.
