

For Research Use Only

ADAM15-Specific Polyclonal antibody

Catalog Number: 16548-1-AP

Basic Information

Catalog Number: 16548-1-AP	GenBank Accession Number: NM_207197	Purification Method: Antigen affinity purification
Size: 150ul	GeneID (NCBI): 8751	
Source: Rabbit	Full Name: ADAM metalloproteinase domain 15	
Isotype: IgG	Calculated MW: 93 kDa	

Applications

Tested Applications:
ELISA

Species Specificity:
human

Background Information

ADAM15, a member of the ADAM (a disintegrin and metalloprotease) family, is a membrane protein containing both protease and adhesion domains and may, thus, be involved in tumor invasion and metastasis (PMID:15756594). It is also named as MDC15. ADAM15 is processed during epididymal maturation and acrosome reaction and that it may play a role during sperm-egg binding. Jurkat and testicular cells express the precursor ADAM15 of 110 kDa, as well as the ADAM15 processing form, consisting of about 75-85 kDa (PMID:18390692). It has 11 isoforms produced by alternative splicing. This antibody is specific to ADAM15.

Storage

Storage:
Store at -20°C. Stable for one year after shipment.
Storage Buffer:
PBS with 0.02% sodium azide and 50% glycerol pH 7.3.
Aliquoting is unnecessary for -20°C storage

*** 20ul sizes contain 0.1% BSA
