

TMUB1 Polyclonal antibody

Catalog Number: 16638-1-AP

Basic Information

Catalog Number:

16638-1-AP

Size:

150ul , Concentration: 280 ug/ml by Nanodrop and 140 ug/ml by Bradford method using BSA as the standard;

Source:

Rabbit

Isotype:

IgG

Immunogen Catalog Number:

AG9988

GenBank Accession Number:

BC000936

GeneID (NCBI):

83590

UNIPROT ID:

Q9BVT8

Full Name:

transmembrane and ubiquitin-like domain containing 1

Calculated MW:

26 kDa

Observed MW:

27 kDa, 24 kDa

Purification Method:

Antigen affinity purification

Recommended Dilutions:

WB 1:500-1:1000

IF/ICC 1:50-1:500

Applications

Tested Applications:

WB, IF/ICC, ELISA

Species Specificity:

human

Positive Controls:

WB : HuH-7 cells, L02 cells

IF/ICC : L02 cells,

Background Information

Transmembrane and ubiquitin-like domain-containing protein 1 (TMUB1), also referred to as hepatocyte odd protein shuttling (HOPS), is a transmembrane ubiquitin-like protein that was originally identified in the regenerated liver. HOPS is a transmembrane protein released into the cell by an enzymatic cleavage. This allows HOPS to be shuttled from the nucleus to the cytoplasm and vice versa, depending on cell cycle and environmental stress conditions. HOPS cDNA expression gives rise to the translation of three different proteins with distinct molecular weights of 27, 24 and 21 kDa, respectively. The three isoforms of HOPS are differentially expressed depending on the tissue being examined. In the brain, the shortest isoform prevails over the other, whereas in the intestine the higher molecular weight isoform prevails among the other two. Indeed, HOPS shows a different concentration of the three isoforms, which can play different cell-dependent functions. The ratio between different isoforms may vary owing to physiopathological changes in the cell (PMID:32860479). 16638-1-AP can detect two bands and some literature also detected two bands (PMID:30610893, 29777440, 29967478)

Storage

Storage:

Store at -20°C. Stable for one year after shipment.

Storage Buffer:

PBS with 0.02% sodium azide and 50% glycerol pH 7.3.

Aliquoting is unnecessary for -20°C storage

***** 20ul sizes contain 0.1% BSA**

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 16638-1-AP (TMUB1 antibody) at dilution of 1:500 incubated at room temperature for 1.5 hours.

Immunofluorescent analysis of (-20°C Methanol) fixed L02 cells using TMUB1 antibody (16638-1-AP) at dilution of 1:200 and CoraLite® 488-Conjugated Goat Anti-Rabbit IgG(H+L).
