MIP-1 Alpha/CCL3 Polyclonal antibody

Catalog Number: 16748-1-AP 1 Publications

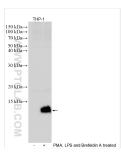

Basic Information	Catalog Number: 16748-1-AP	GenBank Accession Number: BC071834	Purification Method: Antigen affinity purification	
	Size:	GenelD (NCBI):	Recommended Dilutions:	
	150ul , Concentration: 500 ug/ml by Nanodrop and 347 ug/ml by Bradford	6348	WB 1:500-1:1000	
		UNIPROT ID:		
	method using BSA as the standard;	P10147		
	Source:	Full Name:		
	Rabbit	chemokine (C-C motif) ligand 3		
	Isotype:	Calculated MW:		
	IgG	92 aa, 10 kDa		
	Immunogen Catalog Number: AG10183			
Applications	Tested Applications:	Positive	Controls:	
, price ions	WB, ELISA	WB: PMA, LPS and Brefeldin A treated THP-1 cells,		
	Cited Applications: WB			
	Species Specificity:			
	human			
	Cited Species:			
	human			
	Chemokine (C-C motif) ligand 3 (CCL3), also known as MIP-1a, belongs to the family of chemokines. CCL3 has been found in the central nervous system and its cognate receptors, CCR1 and CCR5, have been reported to be expressed by astrocytes, microglia and neurons. CCL3 and its receptors, CCR1 and CCR5, also contribute to the development of bone disease in multiple myeloma by supporting tumor growth and regulating osteoclast differentiation. CCL3 is also associated with the regulation of cell growth, angiogenesis, and metastasis of different tumors such as melanoma, renal cell carcinoma, and colorectal cancer. Moreover, CCL3 enhances cell migration and metastasis by up-regulating matrix metalloproteinase-2 (MMP)-2 expression in chondrosarcoma cells.

Selected Validation Data

PMA, LPS and Brefeldin A treated THP-1 cells were subjected to SDS PAGE followed by western blot with 16748-1-AP (MIP-1 Alpha/CCL3 antibody) at dilution of 1:500 incubated at room temperature for 1.5 hours.
